Prescription Drug Abuse Symposium

Rebuilding the Hoosier Heartland

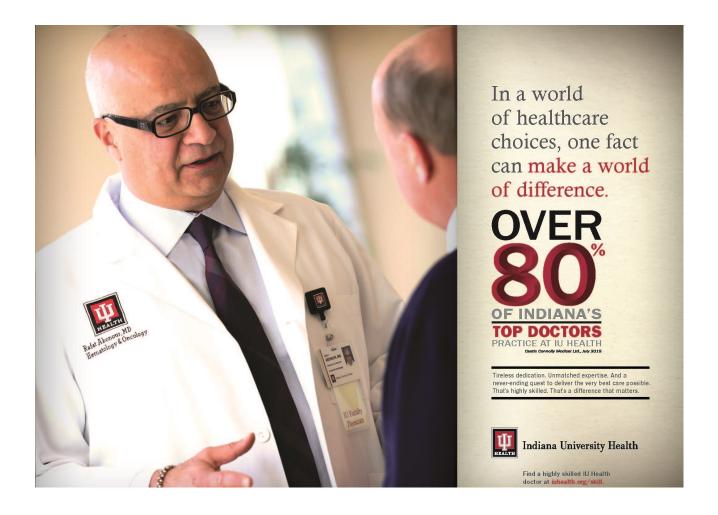

Indiana Convention Center Indianapolis, IN

October 13th 2016 7:30 am - 4:45 pm

October 14th 2016 7:30 am - 5:00 pm

Throughout Indiana and the nation, we know that prescription drug abuse is a growing epidemic. Drug monitoring – or medication compliance – tests can be an integral step in monitoring patients for misuse of opioids, illicit substances, or many other commonly prescribed medications.

But most healthcare providers know that drug monitoring is not as simple as it seems.

Aegis, a national laboratory sciences company, is pleased to offer all attendees of the 7th Annual Prescription Drug Abuse & Heroin Symposium a free download of our comprehensive *Guide to Drug Testing in Healthcare*. Healthcare providers, educators, and policymakers will gain valuable insights into how drug monitoring can minimize abuse and diversion.

GREG ZOELLER
INDIANA ATTORNEY GENERAL

INDIANA GOVERNMENT CENTER SOUTH, FIFTH FLOOR 302 W. WASHINGTON STREET • INDIANAPOLIS, IN 46204-2770 www.AttorneyGeneral.IN.gov

TELEPHONE: 317.232.6201 FAX: 317.232.7979

Dear Special Guests:

Welcome to the 7th Annual Prescription Drug Abuse Symposium.

As I complete my 2nd term as Indiana's Attorney General, I am reminded of the number of successes the Indiana Prescription Drug Task Force has achieved since its inception. We have made great strides, not only in awareness and prevention, but in reducing barriers to treatment, and in increased harm reduction strategies. Our achievements are attributed to the dedication and commitment of our Task Force members, your efforts to change state law, and the grassroots efforts of those of you working in your communities.

This past year's legislative session was a great success for mental health and addiction advocates. The Task Force and Mental Health of America of Indiana were instrumental in working with legislators to pass ground-breaking laws in the area of addiction treatment. Senate Enrolled Act 297 helps integrate addiction treatment into the health care system and treats it like any other disease. The legislation which took effect July 1st, provides an evidence based, comprehensive approach to opioid treatment in Indiana by requiring the Division of Mental Health and Addiction (DMAH) to develop clinical practice guidelines for those authorized to prescribe Suboxone, and for opioid treatment providers (OTP). It also requires Medicaid coverage for inpatient detoxification for the treatment of opioid or alcohol dependence when medically necessary, which is now defined as a measure of success with recovery from addiction.

We have also been able to increase the availability of naloxone by working with the non-profit groups, namely Overdose Lifeline and Indiana Recovery Alliance, to train and equip first responders with kits across the state. This was made possible through funds received from consumer settlements with pharmaceutical companies. The organizations were successful in training 130 agencies in 24 counties, and distributed approximately 5730 kits. In just 7 months, these kits were responsible for saving at least 77 lives.

My personal thanks to all of you, our Task Force members, all of our speakers who have volunteered to present at this symposium, and to those lending financial support. This program would not be possible without your involvement. We hope all participants benefit from this program and are able to apply the learning objectives presented to continue actively addressing this issue in our state.

Sincerely,

Gregory F. Zoeller Indiana Attorney General

Instructions on Colts Ticket Drawing

- 1. Visit each exhibitor's booth and receive a stamp on your exhibitor card. Once you have visited every booth, you will be eligible to enter a drawing for two free Colts tickets.
- 2. Visit the BitterPill.in.gov booth and present your card to enter the drawing.
- 3. The drawings will be held on October 14th. You must be present to win.
- *Only one entry per person please. State employees are NOT eligible for the drawing.

Continuing Education Units

CLE ACCREDITATION

The Indiana CLE Commission has approved the sessions noted on the agenda in this program guide for accreditation. You must attend those specific sessions in order to receive the full 10 hours of general credit. Two of the general sessions were approved for non-legal subject matter. You may receive a total of 12 credit hours for the full two day program (10 general CLE hrs and 2 NLS hrs). Please note the maximum Non-Legal Subject (NLS) credits per three-year education period that can be claimed by the corresponding category of individuals is: Attorney - 12; State Level Judicial Officer - 18.

ACPE PHARMACIST ACCREDITATION

Purdue University College of Pharmacy is accredited by the accreditation council for pharmacy education as a provider of continuing pharmacy education. This is a knowledge based continuing education activity of Purdue University, an equal access/equal opportunity institution. Universal Activity Number (UAN): 0018-9999-16-058-L04-P, 12.0 contact hours (1.2 CEU). Conference Dates: 10/13/2016 thru 10/14/2016. Both dates must be attended and verified to receive credit which will be uploaded to CPE Monitor within 60 days of the event.

CME ACCREDITATION

The ISMA has approved a full 33 Hours of Instruction for this symposium, based on the number of educational sessions being offered. However, the ISMA designates this live activity for a maximum of 12 AMA PRA Category 1 Credit(s)TM. Physicians should only claim the credit commensurate with the extent of their participation in the activity.

CEU ACCREDITATION

The Indiana Family Social Services Administration has approved this program for 12 credit hours for Social Workers, Addiction Counselors, Marriage & Family Therapists & Mental Health Counselors.

LETB ACCREDITATION

Law Enforcement Training Board (LETB) Credit –Participation in this program may partially satisfy law enforcement inservice training requirements per the Indiana Law Enforcement Training Academy.

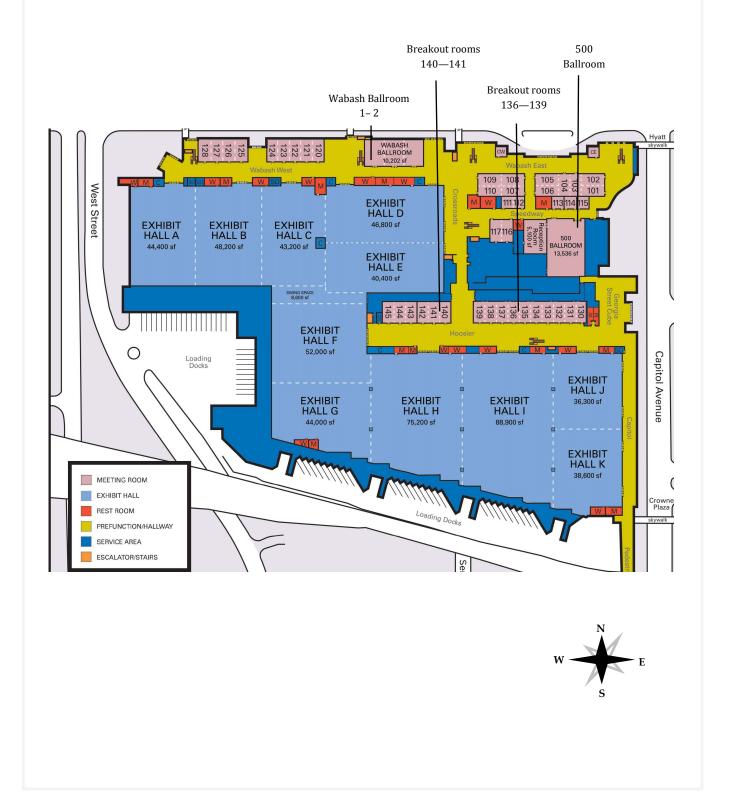

A special thank you to our sponsors

AGENDA — Day One: Thursday, October 13, 2016

7:30-8:30am Registration, Breakfast and Exhibits Visit all of our exhibitors & enter to win two free Colts Game Tickets at the BitterPill Booth Reception Rm 8:30 - 8:45 am Welcome/Opening Remarks Ballroom 500 Greg Zoeller, Indiana Attorney General, Co-Chair of the Prescription Drug Abuse Prevention Task Force Congresswoman Susan Brooks, Representing Indiana's 5th District 8:45-9:45 am Keynote Address: The Story of the Opiate Epidemic and How We Got Here (CLE) Sam Quinones, Author of the book Dreamland Ballroom 500 9:45-10:00am Break 10:00-11:00 am **Breakout Sessions:** 1. Benzodiazepines Use-Navigating Crucial Conversations Sheila Wright, Psychiatric Nurse Practitioner, Centerstone Wahash 2-3 2. Why Are So Few Physicians Treating Addiction? What can we do about it? Rms 136-137 Barbara Andraka-Christou, Attorney at Law, Enfoglobe, Inc.; Post-Doctoral Fellow, Richard M. Fairbanks School of Public Health 3. Addressing Addiction Behind the Walls (CLE) Rms 138-139 Stephanie Spoolstra, Director of Addiction Recovery, Indiana Department of Correction Alexis Dean, Executive Director of Re-entry and Medicaid, Indiana Department of Correction 4. Pharmacists and Student Pharmacists Involvement in Drug Abuse Issues (CLE) Rms 140-141 Patti Darbishire, PharmD, Clinical Associate Professor & Director of Pharmacy Practice, Purdue University College of Pharmacy Cynthia Koh-Knox, Clinical Associate Professor, Purdue University College of Pharmacy Wesley Horner, PharmD Candidate, Purdue University College of Pharmacy Alexa Proctor, PharmD Candidate, Purdue University College of Pharmacy Jessica Krug, Deputy Attorney General, MFCU, Office of the Indiana Attorney General 11:00-11:15 am Break 11:15am - 12:15 pm **Breakout Sessions:** 1. MAT - Successful Collaboration with Courts & Law Enforcement (CLE) Keith Vukasinovich, CEO, Recovery of Indiana Wabash 2-3 2. Opioids: What Our Community Needs To Know and Prepare - Healing w/ Hope Rms 136-137 Marcia Haaff, Chief Executive Officer, The Lutheran Foundation Kristina Johnson, Director of Community Initiatives, The Lutheran Foundation 3. Project Point: A New Approach to Improving Care for Patients of Opiate Overdose (CLE) Krista Brucker, MD, Prof. of Emergency Medicine, Eskenazi Hospital, IU School of Medicine Rms 138-139 Dan O'Donnell, MD, Medical Director of Indiana Emergency Medical Services, Indianapolis Fire Department

and Indianapolis Metro Police Department

Day One: Thursday, October 13, 2016 — AGENDA

4. Treatment, Recovery, & Reproductive Health Services. Doesn't It Make Sense? (Continued) Rms 140-141 Larry Humbert, Independent Consultant for Maternal and Child Health John Stutsman, MD, OBGYN Department, Indiana University School of Medicine Marcie Toler, Enrollment Specialist, Covering Kids and Families of Indiana 12:00-1:15 pm Lunch on Your Own 1:15-2:15 pm **Breakout Sessions:** 1. Coaching For Success: Intergration of the Recovery Model and MAT Rms 136-137 Greg May, Grants and Data Manager, Centerstone Caleb Barham, Team Leader, Centerstone Sarah Barham, Recovery Coach, Centerstone 2. Drug Abuse at the Crossroads Between the Living and the Dead (CLE) Wabash 2-3 Michael Wagner, Medical Director, LabPro Inc. 3. Community Continuum of Supports: A Framework for Community Empowerment Rms 138-139 Allison Howland, Research Scientist, Indiana University Nicole Zautra, Research Associate, Indiana University Megan Benetti, Research Associate, Indiana University Lori Croasdell, Coordinator, Coalition to Eliminate the Abuse of Substance of Scott County, Rx Drug Abuse Prevention Coordinator, Communities That Care Outreach Coordinator Rms 140-141 4. The Role of Physical Therapy in the Management of Chronic Pain Guilermo Cutrone, PT, DSc, Assistant Professor / Director of Student Affairs, South College Lina Avendano, Staff Physical Therapist, St. Vincent Rehabilitation Therapies 2:15-2:30 pm Break 2:30-3:30 pm **Breakout Sessions:** Rms 136-137 1. How to 10-90 Life: Using REPT Skills in a Recovery Lifestyle Randy Evans, Licensed Addiction Counselor, Families First Indiana 2. How Pharmacists and Pharmacy Technicians Can Curb Indiana's Meth Lab Crisis (CLE) Rms 138-139 Harry Webb, Pharmacist, Webb's Family Pharmacy Marc Williamson, Substance Abuse Prevention Specialist, Drug Free Fulton County 3. Harm Reduction Works Wabash 2-3 Christopher Abert, Director, Indiana Recovery Alliance Christy Thrasher, Director, Indiana Naloxone Project Rms 140-141 4.Born Dependent—Neonatal Abstinence Syndrome: Helping Mom & Baby Jane Bisbee, Field Director, Indiana Department of Child Services Maria Del Rio Hoover, MD, Neonatologist, St. Mary's Hospital for Women and Children John C. Ellis, MD, FAAP, Medical Director of MHS of Indiana 3:30-3:45 pm **Break** 3:45-4:45 pm General Session: International Efforts to Reduce Heroin Supply (CLE)

4

Ballroom 500

Victor Antonio Carrancá Bourget, Attorney General of the State of Puebla, Mexico

AGENDA — Day Two: Friday October 14, 2016

7:30–8:30 am Registration, Breakfast, and Exhibits

Reception Rm Visit all of our exhibitors & enter to win two free Colts Game Tickets at the BitterPill Booth

8:30—8:45 am Welcome/Opening Remarks

Ballroom 500 Joan Duwve, Chief Medical Officer, Indiana State ept of Health, Indiana Prescription Drug Abuse Prevention

Task Force, Associate Dean for Public Health Practice, IU Richards M. Fairbanks School of Public Health

Greg Westfall, Assistant Special Agent in Charge of Indianapolis District Office of the DEA

8:45—9:45 am General Session: Opioids and Pregnancy—Life Course Perspectives (NLS)

Ballroom 500 Mishka Terplan MD MPH, Medical Director of Behavioral Health Systems Baltimore

9:45—10:00 am **Break**

10:00—11:00 am **Breakout Sessions:**

Rms 136-137 1. Recovery Works & the Gold Card Program

John Ross, Clinical Pharmacist, Office of Medicaid Policy and Planning

Sara K. Cozad, Assistant Deputy Director of Adult Services, Division of Mental Health and Addiction

Rms 138-139 2. Don't be a Weak link:

Developing a Multidisciplinary Public Safety Naloxone Program (CLE)

Michael Brown, *District Chief of EMS, Fort Wayne Fire Department* Justin Phillips, *President and Founder of Overdose-Lifeline, Inc.*

Rms 140-141 3. Teen Substance Abuse; America's #1 Public Health Problem

Amy LaHood, MD, St. Vincent Hospital

Wabash 2-3 4. Managing Acute Pain Patients Suffering from Heroin Addiction: 4 Patient Cases

Tracy Brooks, R.Ph., Interim Chair Pharmacy Practice Department at Manchester University

College of Pharmacy

11:00 – 11:15 am **Break**

5

11:15 −12:15 pm **Breakout Sessions:**

Day Two: Friday, October 14, 2016 — AGENDA

(Continued) 4. Identifying and Implementing Effective Prevention Strategies to Combat the Opioid Epidemic-Practical Application in Your Community Wabash 2-3 Courtney Olcott, Prevention Specialist, Indiana Prevention Resource Center Vera Mangrum, Ph.D. Division of Mental Health & Addiction, Family & Social Services Agency Jasynda Radanovich, Indiana Prevention Resource Center (IPRC)-Indiana University 12:15-1:15pm Lunch Provided in the Reception Room/500 Ballroom Live musical performance by Jimmy Ryser 1:15-2:15 pm **General Session:** Ballroom 500 **Building Local Capacity to Prevent Prescription & Opiate Drug Abuse** (NLS) J. David Hawkins, Ph.D., Endowed Professor of Prevention, University of Washington 2:15-2:30 pm Break 2:30-3:30 pm **Breakout Sessions:** Rms 138-139 1. Bad Medicine Darrin Mangiacarne, DO, Medical Director, Fairbanks Hospital Wabash 2-3 2. Community Collaboration & MAT: How Our Community Addressed Substance **Abuse Crisis** Joan Erwin, RN, CleanSlate Centers Deborah McMahan, MD, Allen County Health Commissioner Rms 140-141 3. How Do We Keep Track of Addicted Professionals With Substance Use Disorder? (CLE) Jessica Krug, Deputy Attorney General, MFCU, Office of the Indiana Attorney General Jay Frederick, Sergeant, Columbus Police Department Rodrigo Garcia, CRNA, Program Director, Co-Founder, Parkdale Treatment Center Rms 136-137 4. It Takes A Village: Preventing Substance Abuse Among Youth Linda Hathaway, Director of Education and Curriculum, McMillen Center for Health Education Kim Manlove, Director, Indiana Addiction Issues Coalition 3:30-3:45 pm**Break** 3:45-4:45pm General Session: Strategies for Success—State's Attorney General Panel (CLE) Ballroom 500 Moderator: Rich Bramer, Program Counsel, National Association of Attorneys General Mitchel Denham, Assistant Deputy Attorney General, Office of the Kentucky Attorney General Jonathan Blanton, Chief of Consumer Protection Section, Office of the Ohio Attorney General Monique A. Anawis, MD, JD, Medical Director, Office of the Illinois Attorney General Johnny Koremenos, Director of Communications and Public Affairs, Wisconsin Department of Justice 4:45-5:00 pm Wrap Up / Closing Remarks Winner of Two Free Colts Game Tickets Will Be Announced

Keynote Address 8:45 am –9:45 am

The Story of the Opiate Epidemic and How We Got Here (CLE)

500 Ballroom

This session will dive into what may be America's most extensive drug crisis. A California-based journalist with deep reporting experience in Mexico, this speaker will weave together individual tales from all quarters of the epidemic. Quinones will also delve into a burgeoning underground economy of cash, drugs, stolen goods. Quinones will also discuss the pharmaceutical companies that downplayed the dangers of addiction to grow a massive market for painkillers. The medical community had once shunned opiates, fearing the potential for abuse and addiction, but drug companies seized on one small, badly run study that suggested otherwise, and managed to build a lucrative industry in pain management, one that fueled and then rested upon "a culture of aggressive opiate use." The result; a "catastrophic synergy" in which over-prescription formed a generation of addicts.

Learning Objectives — At the completion of this presentation the participant will be able to:

- •Understand how sugar cane farmers in a small county on the west coast of Mexico created a unique distribution system that brought black tar heroin to the veins of people across the United States.
- Recognize the role the Medical and Pharmaceutical communities played that lead to the current state of our nation's opioid epidemic.
- •Identify contributing factors that led many pain patients and others to become addicted to opiates and later black tar heroin when its availability decreased.

Breakout Sessions 10:00 am - 11:00 am

1. Benzodiazepines Use-Navigating Crucial Conversations

Wabash 2-3

Clinicians are often faced with challenges when it comes to having difficult conversations and educating their clients on the pitfalls of benzodiazepine dependence. Steady increases in the number of patients being prescribed benzodiazepines for long term use are leading to increases in the number of patients becoming increasingly psychologically and physically dependent. In many instances, patients are concurrently using pain medications and benzodiazepines, which is a dangerous combination. However, when providers make suggestions to adjust these medications often time's patients do not respond favorably. The goal of this session is to provide practical information and provide the necessary tools to providers to make it easier for them to explain to their clients why tapering and monitoring of benzodiazepines may be necessary, and/or why they will not prescribe the benzodiazepine in the first place. The conclusion of this session will provide attendees with a patient education brochure that can be utilized by providers to help initiate dialogue with patients about benzodiazepine use.

Learning Objectives — At the completion of this presentation the participant will be able to:

- Explain how their practice may benefit with use of patient education in the form of a fact sheet or brochure on benzodiazepines.
- Verbalize the rationale of addressing benzodiazepine tapering, monitoring, dependence, and withdrawal.
- •Identify resources that can be utilized to help with education and discussions with clients about benzodiazepine use.

2. Why Are So Few Physicians Treating Addiction? What Can We Do About It?

Rms 136-137

Medication-assisted treatment (MAT) in combination with counseling is considered the most effective treatment by many experts. The demand for MAT has increased as a result of insurance expansion under the Affordable Care Act and increasing rates of opioid dependence. However, only 46% of U.S. counties have a physician certified to provide buprenorphine treatment, and multiple states do not have a single methadone clinic. Why are so few physicians prescribing MAT? This session explores reasons, including historical separation of physicians from addiction treatment; regulatory barriers; low Medicaid reimbursement rates; insurance barriers; and minimal education in medical schools and residency programs. The session concludes by examining potential State and Federal policies for increasing physician engagement in substance use disorder treatment. Information presented is based on a literature review of medical, public health, and legal literature, as well as interviews by the presenter with over 20 physicians and 15 mental health counselors.

Learning Objectives - At the completion of this presentation the participant will be able to:

- •Identify reasons for minimal physician involvement in substance use dependence treatment.
- Understand the influence of history, regulatory barriers, insurance barriers, and education on under-use of medication-assisted treatment.
- Recommend policies for increasing physician involvement in substance use dependence treatment.

3. Addressing Addiction Behind the Walls (CLE)

Rms 138-139

In light of the State's growing addiction epidemic, Indiana's Department of Correction has been transforming from a traditional focus of incarceration to one of rehabilitation. The State recognizes that increased competency in skills of daily living, connections to community-based resources, and interventions that target the whole person through clinical treatment and targeted case management will result in an overall safer community and provide incarcerated individuals a better chance at a life of recovery. In order to address the whole-person, the IDOC has taken several innovative approaches that will be discussed in this session. Highlighted topics include the Department's Program Improvement Initiatives for all IDOC Addiction Recovery Services, Vivitrol Pilot Program, Purposeful Incarceration Initiative, Recovery Coach training, and Medicaid/HIP 2.0 Linkage and Integration of Medical Health with Mental Health and Addiction Recovery.

Learning Objectives — At the completion of this presentation the participant will be able to:

- Articulate how Indiana's growing problem with addiction is changing the role of the Indiana Department of Correction.
- Recognize the best practices put into place by the Department of Correction to aid in community safety and increased access to addiction.
- •Understand the collaborative role required between the community and the IDOC in addressing the addiction epidemic.

4. Pharmacists and Student Pharmacists Involvement in Drug Abuse Issues (CLE)

Rms 140-141

In this 3—part panel presentation, a Purdue pharmacy faculty member and students will discuss their research on drug screening/testing policies in US Colleges of Pharmacy. A member of the Licensing Enforcement division of the office of the attorney general will discuss the Indiana Licensing discipline structure and the impact that diversion and addiction can have on a pharmacist or pharmacy student's license. Lastly, another Purdue pharmacy faculty member will discuss how advanced pharmacy students use their expertise to impact those within the Tippecanoe County Community Corrections system.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Describe what is currently known about drug screening policies in US Colleges of Pharmacy, frequency of incidents, and types of substances misused by pharmacy students.
- •Describe the Indiana licensing discipline structure and the impact that diversion and addiction can have on a pharmacist of pharmacy student's license.
- •Explain the Community Corrections Rotation for advanced professional pharmacy students.

Breakout Sessions 11:15 am — 12:15 pm

1. MAT - Successful Collaboration with Courts & Law Enforcement (CLE)

Wabash 2-3

This session will provide participants with the basic framework for the implementation of Medicated Assisted Treatment services that is in collaboration with the court services and law enforcement. Clinical programs discussed will include MAT services with both buprenorphine and Vivitrol. This session will explain how Prescription Drug Monitoring Programs monitoring, EMR's and Toxicology Services factor into the successful implantation of MAT services and why these aspects of service delivery are crucial to effecting collaboration with court services. In addition, this session will also discuss how confidentiality concerns associated with HIPAA have been addressed in existing programs.

Learning Objectives: At the completion of this presentation the participant will be able to:

- Explain how their practice may benefit with use of patient education in the form of a fact sheet or brochure on benzodiazepines
- •Verbalize the rationale of addressing benzodiazepine tapering, monitoring, dependence, withdrawal, and appropriate use and identifying potential misuse.
- •Identify resources that can be utilized to help with education and discussing with clients about benzodiazepine use.

2. Opioids: What Our Community Needs To Know and Prepare - Healing with Hope Rms 136-137

"Healing our Community with Hope" focuses on The Lutheran Foundation's success in coalition-building and advocacy within the mental/behavioral health and wellness realm. Additionally, this presentation provides information on their educational initiatives, including their website, Look Up (www.lookupindiana.org). The Lutheran Foundation will share data from a needs assessment that had commissioned in 2013/2014 meant to identify the gaps in mental health and addiction treatment delivery throughout the ten northeast Indiana counties they serve. Praxis Strategies, who conducted the assessment, provided several recommendations that were needed. In response to these recommendations, The Lutheran Foundation initiated a regional mental health coalition to focus on improving mental/behavioral health care and wellness. They have also collaborated with Indiana's Division of Mental Health and Addiction to further develop system of care within Allen and Adams counties, focusing on mental health, substance abuse, and juvenile justice. For those interested in building coalitions and collaborations, educating the masses on mental/behavioral health issues, and building campaigns meant to reduce the stigma associated with mental illness and addictions, this presentation is for you.

Learning Objectives — At the completion of this presentation the participant will be able to:

- Explain the connection between mental illness and prescription drug use and abuse.
- •List at least three places of information that parents need to talk to and educate their children about.
- •Explain that prescription abuse is not a problem for just one segment of society; it is a problem affecting the entire community.

3. Project Point: A New Approach to Improving Care for Patients of Opiate Overdose (CLE) Rms 138-139

This session will describe the innovations of Indianapolis Emergency Services new project POINT: Planned Outreach, Intervention, Naloxone, and Treatment which was designed to help meet the opioid overdose public health crisis. This program represents a new approach to improving care for opioid overdose patients who receive Naloxone before Emergency Department arrival. This session will outline how POINT connects patients with a trained staff member from the I-MES community-based paramedicine team. This brief Emergency Department Intervention provides a range of services including education on home administration of Naloxone, Naloxone prescriptions, referrals to health system navigators and community based substance abuse treatment options. We will discuss what makes POINT a unique approach to the opioid overdose epidemic and present preliminary data from the patients participating in POINT program from February to August 2016.

Learning Objectives — At the completion of this presentation the participant will be able to:

- •Describe the innovations of Indianapolis Emergency Services' new project POINT: a new approach to improving care for opioid overdose patients who receive Naloxone.
- •Describe some preliminary findings from POINT's work with opioid overdose patients who receive Naloxone by pre-hospital providers
- Describe some of the challenges faced by POINT patients with linkage to ongoing care and social services among others.

4. Treatment, Recovery, and Reproductive Health Services. Doesn't It Make Sense?

Rms 140-141

Participants will be introduced to the unique concept, rationale and value of including the topic of reproductive health services into ongoing treatment and recovery efforts with women of child bearing age. Current data regarding the incidence and impact of unplanned pregnancies, survey data from women in active treatment, and the incidence of drug exposed babies and infant deaths in Indiana will also be shared. An overview of available resources and a framework of how to discuss this issue with women will be offered. Participants will also be given the opportunity to provided important feedback on the feasibility of focusing on this new strategy and their opinions regarding successful implementation.

Learning Objectives — At the completion of this presentation the participant will be able to:

- •Understand the purpose, value and overall intent for including the topic of reproductive health when working with women in active treatment or recovery.
- •Increase their knowledge about the effectiveness of various forms of contraception, how to discuss this topic with female and male clients.
- •Increase their knowledge of the eligibility and application process for HIP 2.0 and where to find additional resources.

Breakout Sessions 1:15 pm - 2:15 pm

1. Coaching For Success: Integration of the Recovery Model and

Rms 136-137

Medicated Assisted Treatment

The prevalence of opiate use and misuse throughout the nation has challenged treatment providers to revise treatment and intervention approaches to support Medicated Assisted Treatment. This presentation will highlight Centerstone's recovery model and the partnership with primary care and the criminal justice system in integrating community wrap around supports and medicated assisted treatment for overall client success. This session will provide a comprehensive overview of a recovery oriented system of care, recovery coaches, and developing and maintain relationships with primary care, the criminal justice system, and existing community resources as a catalyst for change.

Learning Objectives — At the completion of this presentation the participant will be able to:

- Understand how a Recovery-oriented systems of care (ROSC) help to sustain long-term recovery.
- •Understand what recovery coaches do and how they can better support MAT and individuals being successful long term in recovery.
- •Begin to build a recovery oriented system of care in their community and think about next steps needed for building more community recovery infrastructure (recovery engagement center, recovery housing, mental health courts, etc.)

2. Drug Abuse at the Crossroads Between the Living and the Dead (CLE)

Wabash 2-3

This session will present real cases to illustrate drug use patterns leading to abuse and fatalities. The unrecognized signs and symptoms and intervention points will be discussed from both clinical and forensic point of view. In addition, postmortem presentation will present findings that should be investigated in patients as possible clinical signs that drug abuse (opiate) is present. Note: This presentation will contain graphic slides that may not be suitable for everyone.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Recognized signs and symptoms of drug abuse clinical intervention points
- •Postmortem assessments that reveal organ damage that may be correlative of opiate abuse & provide tools to assess ante mortem cases.
- •Postmortem death scenes and autopsy findings; key findings that indicate opiate death may be associated with cause of death.

3. Community Continuum of Supports: A Framework for Community Empowerment

Rms 138-139

This presentation proposes a community empowerment framework to address prescription opioid misuse. While communities are often only able to allocate resources to containing and reducing impact of harm, attention must also be paid to the underlying causes of this public health problem. It is imperative that perspectives broaden to include prevention and health promotion strategies. The discussion is framed through recommendations and findings of a qualitative research study of intravenous opioid use in Scott County. The study sought to identify the underlying causes of the epidemic through eliciting the perspectives of community members' experiences. Mental health, relationships, and community factors were found to be key, interrelated social determinants that served as both risk and protective factors. The framework addresses these social determinants by utilizing practical, multifaceted intervention and prevention strategies at individual, community, and systems levels. Upstream and downstream approaches are crucial to reducing harm, preventing use, and promoting wellness in communities. All community members are targeted in this framework, regardless of their experience with opioid use and its consequences.

Learning Objectives — At the completion of this presentation the participant will be able to:

- •Describe the three underlying causes of an opioid use epidemic in a rural community.
- •Identify key prevention strategies for community health promotion.
- •Differentiate substance use prevention strategies based on the individual, community, and system level.

4. The Role of Physical Therapy in the Management of Chronic Pain

Rms 140-141

Recently, Centers of Disease Control and prevention (CDC) released a guideline for prescribing opioids for chronic pain. Physical therapy has been recognized as a safer and more effective chronic pain treatment alternative among people who misuse, abuse, or overdose from these drugs. This presentation provides evidence-based practice recommendations for the involvement of physical therapists in the management of chronic pain due to musculoskeletal conditions, or non-musculoskeletal clinical presentations with concomitant physical impairments. Presenters share their expertise highlighting the background of this epidemic, and briefly explaining how physical therapists approach this patient population based on current evidence.

Learning Objectives — At the completion of this presentation the participant will be able to:

- Recognize health care professionals responsibility in dangerous pain management strategies, leading to poor clinical outcomes.
- •Increase awareness of potential detrimental effects caused by focusing on biomedical vs. biopsychosocial models in this patient population.
- Have a deeper understanding of how Physical Therapist work with patients with chronic pain of musculoskeletal origin and expose pathways of interdisciplinary collaboration to maximize functional outcomes in this population.

Breakout Sessions 2:30 pm−3:30 pm

1. How to 10-90 Life: Using REBT Skills in a Recovery Lifestyle

Rms 136-137

Rational Emotive Behavioral Therapy and other forms of Cognitive Behavior Therapy are widely used in evidenced-based addiction treatment facilities across the country. Many who are wanting to maintain sobriety will struggle with high-risk emotions and behaviors which can easily lead to relapse. This workshop will introduce the basics of REBT, comparing it to the basic elements of computers. This will help clinicians and lay people teach and counsel those suffering from addiction to reduce or eliminate their "trigger" emotions ie: anger, boredom, stress, anxiety, etc.. Clients completing a 4-month IOP drug treatment program state that "Learning to 10-90 life was one of the main things which helped me continue my recovery." To "10-90 life" simply means learning to replace irrational addictive thoughts with rational, self-improving thoughts in order to give 10% of our mental attention to what happens to us, and 90% of our mental energy to how best to respond to those things.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Understand the basics of Rational Emotive Behavioral Therapy, and how everyone processes life events "from the inside out."
- •The participant will learn a very specific and practical application of this widely used therapy which will enable them to better counsel or encourage someone who is struggling with how to manage a whole host of life-issues connected with a sober lifestyle.
- •Apply the "5 rules of Rational Thinking" to their various reactions to events, and to recognize major "thinking errors" which can lead to relapse and other self-destructive behaviors.

2. How Pharmacists and Pharmacy Technicians Can Curb Indiana's Meth Lab Crisis (CLE) Rms 138-139

For the past three years Indiana has led the nation in clandestine methamphetamine lab discoveries. These toxic labs are affecting hundreds of children's lives, destroying property and costing Indiana millions of dollars. Pharmacies are fueling this epidemic with unabated sales of pseudoephedrine. It is estimated that over 80 percent of all pseudoephedrine sales is being used to make methamphetamine. Attendees of this presentation will gain insight about this preventable crisis and learn how to use the new laws that protect and empowers pharmacists and pharmacy staff to legitimize sales easily without conflict and allows your patients in need of effective decongestants to get the proper treatment.

Learning Objectives—At the completion of this presentation the participant will be able to:

- Gain Understanding of Indiana's Meth Lab crisis.
- Gain insight into the world of smurfing and how to recognize and deter pseudoephedrine from getting into the hands of the meth cook.
- Understand the new laws regulating the sale of pseudoephedrine and best practice solutions to implement in your workplace.

3. Harm Reduction Works Wabash 2-3

Harm reduction is a set of practical strategies and ideas aimed at reducing negative consequences associated with drug use. Licit and illicit drug use is part of our world but we need to work to minimize its harmful effects rather than simply ignore or condemn folks. This session will help to understand that drug use is a complex, multi-faceted phenomenon that encompasses a continuum of behaviors from severe abuse to total abstinence, and acknowledges that some ways of using drugs are clearly safer than others. It also examines how drugs users themselves can be the primary agents of reducing the harms of their drug use and how we can empower users to share information and support each other in strategies which meet their actual conditions of use. It will address what harm reduction strategies and results are taking place in Southern Indiana.

Learning Objectives — At the completion of this presentation the participant will be able to:

- Define harm reduction.
- Recognize key principles of harm reduction.
- Identify the need for harm reduction in Indiana, with a focus on people who inject drugs, and the current barriers to access those services.

4. Born Dependent – Neonatal Abstinence Syndrome: Helping Mom & Baby

Rms 140-141

The Neonatal Abstinence Syndrome (NAS) Task Force is a committee of the Indiana Perinatal Quality Improvement Collaborative (IPQIC) that was developed to establish appropriate and effective models for identification, data collection and reporting of NAS. In this session you will hear from members of this group as they explain the guidelines developed for maternal testing, cord blood testing and reporting to the Indiana State Department of Health. They will also share data collected from four pilot hospitals where these guidelines were implemented. You will also learn proper obstetric and perinatal protocols when dealing with the issues surrounding NAS. Additionally, this session will explore how the Department of Child Services (DCS) plays an important role in helping the mothers cope with addiction and develop life skills, while also protecting the baby.

Learning Objectives - At the completion of this presentation the participant will be able to:

- •Understand the appropriate standard clinical definition of NAS and the uniform process of identifying and testing for it.
- •Identify what resources have been developed for pregnant women regarding substance use for providers on proper treatment protocols before and after delivery.
- •Learn about ways that various organizations and agencies are collaborating to better address NAS and provide resources to support mothers and babies struggling with opioid dependency and addiction.

General Session 3:30 pm -4:30 pm

International Efforts to Reduce Heroin Supply (CLE)

500 Ballroom

According to the Centers for Disease Control, heroin-related deaths jumped 39 percent from 2012-13. In 2013 alone an estimated 517,000 people reported that they had used heroin within the last year. Nationally, 8,260 Americans lost their lives as a result of a heroin overdose in 2013. Worst of all, heroin use more than doubled among young adults ages 18-25 in the past decade. The Puebla Attorney General will address this topic of production, trafficking and consumption of heroin in Mexico, particularly in the Southern portion of the country where trafficking comes up from South America and makes its way north through Mexico, the United States and beyond.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Understand trends and analysis by the Attorney General's Office, who is charged with investigating and prosecuting all crimes in the state.
- •Identify trafficking trends of product coming through Mexico from the south and the connection with other trafficking activities.
- •Learn about the public health crisis in Mexico and Mexico State AGO response.

General Session 8:45 am - 9:45 am

Opioids & Pregnancy: Life Course Perspectives (NLS)

500 Ballroom

This session will review the history and current epidemiology of the opioid epidemic - paying particular attention to pregnant women and their newborns. It will review the care of the maternal/fetal emphasizing the role of screening and treatment including the non-pharmacologic management of neonatal abstinence syndrome (NAS). Additionally, this session will explore the ways in which opioid addiction can impact those throughout the full life course continuum if prevention and early detection strategies aren't implemented soon enough.

Learning Objectives — At the completion of this presentation the participant will be able to:

- •Understand the history and current context of the opioid epidemic.
- $\bullet \mbox{Explain}$ the importance of treatment for opioid addiction in pregnancy.
- •Understand the factors that contribute to the development of NAS.

Breakout Sessions 10:00 am -11:00 am

1. Recovery Works & the Gold Card Program

Rms 136-137

Promoting recovery through community support and treatment/intervention is critical in reducing the number of persons with mental health and addiction disorders that are entering our criminal justice system. This session shows an overview of the state funded programs through Indiana Family and Social Services Agency that would be beneficial in treating those with substance abuse. It explores how the Recovery Works is a voucher program designed to provide support services to those without insurance coverage who are involved with the criminal justice system. It also shows how it reduces recidivism and increases the availability of specialized mental health treatment and recovery services in the community for those who may otherwise face incarceration. This session also provides an overview of the Gold Card program which allows Indiana Medicaid members to become Gold Card providers and prescribe medicated assisted treatment while reducing administrative burdens.

Learning Objective – At the completion of this presentation the participant will be able to:

- •Discover how to access funding to assist those in the criminal justice setting who are suffering from addiction.
- •Learn how qualified providers can be exempt from prior authorization submissions for preferred buprenorphine and buprenorphine/naloxone drugs for the treatment of IHCP members with opioid dependence.

2. Don't be a Weak link: Developing a Multidisciplinary Public Safety Naloxone Program (CLE) Rms 138-139

In this session each participant will be informed of available resources to begin a naloxone training program. Best practices will be shared to design a system that unites all responders to assist individuals experiencing an overdose. We will further discuss how public safety can be a community wide resource on naloxone use. A complete, comprehensive training program will be outlined and each person will be given access to presentations that can be utilized by their home agency. Some technology pointers will be given to allow the participants to leverage the virtual classroom to educated responders. Kit setup and demonstration will also be presented live. This will give each attendee the tools to plan and implement a naloxone program.

- Learning Objectives: At the completion of this presentation the participant will be able to:
- •Identify assistance programs available for Public Safety agencies to begin naloxone programs.
- Understand need for multi disciplinary approach to maximize effect.
- •Prepare to assist other community partners in responding to overdoses.

3. Teen Substance Use; America's #1 Public Health Problem

Rms 140-141

This session will explain the brain mechanics of adolescents under the age of 24 and how substance use physically alters brain structure and functions faster and more intensely than in adults. Early use of opioids can interfere with early brain development, further impair judgment and significantly increase the risk of addiction. You will get a good look at the consequences of opioid use in youth, even when prescribed in small amounts for legitimate pain. A study shows that 90% of adults with substance abuse (nicotine/alcohol/drugs) began smoking, drinking or using drugs under the age of 18 years of age. This session looks overall at how delaying substance use in youth can prevent abuse in adults.

Learning Objectives — At the completion of this presentation the participant will be able to:

- •Learn how children under 15 years old who use any addictive substances are 6.5X more likely to develop a substance use disorder as those who delay use until age 21 or older .
- •Identify commonly used drugs by teens and how they are obtained.
- •Identify ways we can delay substance use in youth, not only medically but also socially.

4. Managing Acute Pain Patients Suffering From Heroin Addiction: 4 Patient Cases

Wabash 2-3

In this session, Tracy Brooks will present the past and current history of IV heroin drug use. Each patient is in need of acute pain management both while they are in the hospital and beyond discharge. This session will discuss the difficulties associated with this area of pain management from both the evidence based direction and experience based direction. The objectives of this session include recognizing that all patients have a right to the treatment of acute pain, a summarization of the main concepts utilized in patients with present and or past drug abuse history, and finally a patient case will be examined to develop the appropriate pain management plan in a patient with acute pain and a current or past history of IV heroin use.

Learning Objectives: - At the completion of this presentation the participant will be able to:

- •Recognize that all patients have a right to the treatment of acute pain.
- •Summarize the main concepts utilized in patients with presenting/past drug abuse history.
- •Given a patient case, develop an appropriate pain management plan (including drug, dose, route, frequency, and monitoring parameters) in a patient with acute pain and a current / past abuse of IV heroin.

Breakout Sessions 11:15 am - 12:15 pm

1. Drug Store Cowboys: Pharmacy Robbery and Burglary for Controlled Substances (CLE)

Rms 136-137

According to the Office of National Drug Control Policy, prescription drug abuse is the nation's fastest- growing drug problem and is significant enough for the Centers for Disease Control and Prevention (CDC) to classify the abuse of prescription pain-killers as an epidemic. Given these trends, the illicit value of controlled prescription drugs creates a powerful incentive for pharmaceutical diversion, particularly in the form of robbery and burglary of retail pharmacies. This presentation utilizes interview data collected from a sample of offenders convicted of these crimes to better understand their motivations and methods as well as identify preventative measures to enhance the security of pharmacies and the safety of their staff and customers.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Explain trends in diverting pharmaceuticals, particularly in the form of pharmacy robbery and burglary.
- •Identify preventative measures to enhance security of pharmacies and the safety of their staff and customers.
- •Outline strategies to reduce pharmacy burglaries and robberies.

2. Adolescent Substance Use Disorder Treatment: What's the Latest?

Rms 140-141

Dr. Hulvershorn and Dr. Adams will provide an update on diagnosis and treatment of adolescents with substance use disorders. They will focus on the delivery of evidence based models (including pharmacotherapy) and describe their work providing screening and brief interventions to youth in school-based settings. Delivery of treatment via telemedicine will also be addressed.

Learning Objectives — At the completion of this presentation the participant will be able to:

- Describe how to diagnose adolescents with substance use disorders.
- •Understand which evidence based models have been developed for adolescents.
- •Explain how treatment can be delivered via telemedicine.

3. Drug Monitoring Program Data (CLE) * Closed to Law Enforcement and State Personnel Only

Rms 138-139

Making a prosecutable case against a pill-mill operator and its employees can be challenging. Because these cases always involve a practitioner who has legal authority to prescribe controlled substances, a considerable amount of evidence is required to prove that the prescribing was outside the scope of accepted medical practice and without a legitimate medical purpose. With the advent of Prescription Monitoring Programs (PDMPs) there is an opportunity to quickly identify high-volume prescribers. MITRE used advanced analytics on 12 million records of Indiana's PDMP data, INSPECT. Employing visual and statistical analyses, graph analysis, geo-spatial analysis and machine learning techniques along with MFCU's current analysis and investigative methods, we will show the future of using data analytics in investigations. We will present a data-driven, webbased, actionable tool to identify overprescribing, negligent prescribing, and other schemes. In this session, attendees will learn to identify dangerous prescribing trends, identify the lethal combinations and quantities, and use the morphine equivalency tables. Attendees will have a chance to test their knowledge through participation in case examples.

Learning Objectives — At the completion of this presentation the participant will be able to:

- •Learn the current investigative process and how PDMP can be mined to inform the data analysis phase.
- Determine how to develop and quickly interpret timeline charts and graphs over longitudinal data for a prescriber and his (her) patients.
- •Monitor emerging polypharmacy from the PDMP data.

4. Identifying and Implementing Effective Prevention Strategies to Combat the Opioid Epidemic-Practical Application in Your Community

Wabash 2-3

Learn how to assess the specific needs in your community to prevent the spread of opioid abuse and gain practical skills on implementing effective prevention strategies to address this epidemic. Obtain knowledge through examples provided of grassroots efforts to prevent the spread of the opioid epidemic by individuals with "on the ground" experience. Participants will engage in activities to better understand prevention science and the application of community level prevention models.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Conduct a needs assessment to be able to make data-driven decisions about opioid abuse in their own community.
- •Use data to choose evidence-based practices to target identified needs of their community to address opioid abuse.
- Understand prevention science and the use of theoretical models to identify and target risk and protective factors associated with opioid abuse.

Building Local Capacity to Prevent Prescription and Opiate Drug Abuse (NLS) 500 Ballroom

A crucial first step in tackling the problem of prescription drug abuse is to raise awareness through education.

Although there have been great strides in raising awareness about the dangers of using illegal drugs, many people are still not aware that the misuse or abuse of prescription drugs can be as dangerous as the use of illegal drugs, leading to addiction and even death. Healthcare providers can play a critical role in prescription drug misuse and abuse prevention. They can screen their patients to identify signs of prescription drug abuse or dependence, and talk with patients about the negative effects of misusing prescription drugs. Patients and families need to ensure they use prescription drugs appropriately, store them securely, and dispose of them safely. Law enforcement and the rest of the communities, can help educate the public through awareness events and harm reduction strategies. This session offers a compelling description of the extent to which the prescription drug abuse problem in America has grown over the last decade, and how we all can play a role preventing it.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Describe risk factors that predict substance abuse and protective factors that reduce the likelihood of abuse.
- •Describe tested preventive interventions proven to prevent prescription and opiate drug abuse before misuse emerges.
- •Describe effective community based strategies for building local capacity to prevent substance abuse.

Breakout Sessions 2:30 pm−3:30 pm

1. Bad Medicine Rms 138-139

This presentation will provide an overview of the current public health crisis that exists in Indiana related to the abuse of prescription drugs and the wide reaching impact this is having in our communities. Dr. Mangiacarne will demonstrate how physician prescribing methods continue to impact this epidemic. This presentation will describe the evolution of these practices and the external forces that impact it. While there has been increased attention to the widespread abuse of opiate prescribing, less attention has been paid to the impact of tranquilizers in the role of addiction. Recent research has determined that medications other than opiates also play a key role in the spike in overdose deaths. Dr. Mangiacarne will describe the common mistakes and pitfalls that occur within the medical practice as it relates to the prescribing of highly addictive medications primarily for the treatment of pain and anxiety as well as discuss safe and effective options.

Learning Objectives —At the completion of this presentation the participant will be able to:

- •Recognize the origin and the perpetuation of drug abuse.
- •Identify safe and more effective options for the treatment of pain and anxiety conditions.
- •Determine when it is necessary to change course in a patient's care and refer the patient to an addiction treatment professional.

2. Community Collaboration and MAT:

Wabash 2-3

How Our Community is Addressing the Substance Abuse Crisis

Substance abuse is a chronic brain disease that typically results in dysfunctional behaviors in both the patients' personal and professional life. A multidisciplinary approach, including medicine, addiction specialists and behavioral specialists has been found to be the most effective. However, providing an integrated treatment plan that addresses all of the patient's needs can be a challenge in our traditionally fractionated healthcare system. This session provides an opportunity to see how a profit doctor-led medication-assisted treatment center, community mental health centers and public health can partner efficiently and effectively to address a substance abuse patients' needs during an opioid epidemic.

Learning Objectives — At the completion of this presentation the participant will be able to:

- •Identify the scope of the opioid problem in our community.
- $\bullet \mbox{Describe}$ the elements of an integrated treatment plan for patients with substance abuse.
- •Describe the effectiveness of medication assisted treatment.

3. How Do We Keep Track of Professionals With Substance Use Disorder? (CLE)

Rms 140-141

A major driver of prescription drug diversion in the healthcare setting is opioid addiction, which has reached an epidemic level both in the U.S. and here in Indiana. Healthcare providers who divert controlled substances away from patients pose a risk to themselves as well as a risk to patient, co-workers, and employers. Diversion has the potential to occur at every institution that handles controlled substances and it is hard to identify warning signs until it is too late. Hospitals and other healthcare facilities have had issues with hiring licensed providers who have a history of drug diversion that did not show up on background checks conducted by the facility as they don't always disclose their complete work history. This session will explore the need for more collaboration with law enforcement and better resources that provide those healthcare facilities with the means to hire the best employees to provide adequate patient care.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Discuss case studies on health professionals skirting the legal and administrative licensing systems
- •Discover how employers have a difficult time hiring reliable health professionals
- •Discuss ways that employers can help identify those red flags when hiring individuals in healthcare settings

4. It Takes A Village: Preventing Substance Abuse Among Youth

Rms 136-137

This session will preview the 2016 Parents360 Rx Action Toolkit created by the Partnership for Drug Free Kids that can be used by professionals from law enforcement, prevention and treatment, as well as by any concerned adults who want to share information about Rx medicine abuse with their friends, family, neighbors and organizations. The toolkit consists of videos, a discussion guide and power-point presentation that are available to individuals and organizations at no charge. This session will also explore the work with the local Opioid Task Force through the Allen County Department of Health to access what communities need to be aware of regarding the increased abuse of opiates and heroin. The use of videos will help illustrate the various entities that need to be included for a community wide response. Attendees will also receive a list of additional resources for further information.

Learning Objectives—At the completion of this presentation the participant will be able to:

- •Talk to family, friends and other parents about Use and Abuse
- •Explain the connection between mental illness and prescription drug use and abuse.
- •Recognize that even small amounts of opioid abuse can affect a young person's developing brain and how they are more susceptible to addiction.

General Session 3:30 pm-4:30 pm

Strategies for Success—State's Attorney General Panel (CLE)

500 Ballroom

This expert panel of Attorney General Staff from the Midwestern Region will provide information on successful initiatives and legislative actions that helped to fight the opioid epidemic in their states. A moderator will facilitate discussions on: (1) legislative changes related to opioid prescribing; (2) strategies and efforts involved with harm reduction, prevention, and law enforcement; and (3) identifying promising changes that can be made to reduce opioid abuse across the state of Indiana. Discussions will focus on the implementation of the different policies and their perceived effects on stakeholder groups. Information collected will provide the audience with key information that will help ongoing community and legislative efforts.

Learning Objectives: At the completion of this presentation the participant will be able to:

- •Cite policy efforts made in other states that had favorable outcomes in combatting the opioid epidemic by reducing the overprescribing and/ or diversion of prescription drugs.
- Recognize harm reduction, prevention and law enforcement strategies that are working in other Midwestern states.
- •Identify impactful efforts being made in the Midwestern region to help reduce opioid abuse that we may implement here in Indiana.

American Institute of Toxicology

Vigilant patient monitoring prevents prescription drug misuse. American Institute of Toxicology, a HealthTrackRx company, is a leading clinical solutions company that strives to improve health outcomes and patient care by assisting providers to mitigate risk in treating patients through prevention and early detection. Visit www.guidemed.com for more information.

Alkermes

Alkermes plc (NASDAQ: ALKS) is a fully integrated, global biopharmaceutical company developing innovative medicines for the treatment of central nervous system (CNS) diseases. The company has a diversified commercial product portfolio and a substantial clinical pipeline of product candidates for chronic diseases that include schizophrenia, depression, addiction and multiple sclerosis. Headquartered in Dublin, Ireland, Alkermes plc has an R&D center in Waltham, Massachusetts; a research and manufacturing facility in Athlone, Ireland; and a manufacturing facility in Wilmington, Ohio. For more information, please visit Alkermes' website at www.alkermes.com

Indiana University Health

Named among the "Best Hospitals in America" by U.S. News & World Report for 19 consecutive years, Indiana University Health is dedicated to providing a unified standard of preeminent, patient-centered care. A unique partnership with Indiana University School of Medicine – one of the nation's leading medical schools – gives our highly skilled physicians access to innovative treatments using the latest research and technology. Learn more at iuhealth.org.

Aegis Science Corporation

Aegis Sciences Corporation is a laboratory sciences company providing science-driven testing and consulting services for clients such as healthcare providers, pharmaceutical companies, professional and amateur sports organizations, leading college and university athletic programs, medical examiners, Fortune 500 corporations, and government agencies through the United States.

LabPro

LabPro, Inc. is your trusted partner in providing full spectrum clinical laboratory testing services to support patient care. Our state of the art facility and equipment provide fast, accurate lab results, and our professional staff ensures the highest standard of customer service. Our mission is to develop a customized solution that allows the provider to dedicate their focus to their patients and provide the highest level of care. Visit www.labpro.com for more information.

Riley Children's at Indiana University Health

The maternity and newborn health program at Riley Children's Health brings together a multidisciplinary team of maternal fetal medicine physicians, neonatologists, and pediatric and adult subspecialists to provide the best care for mother and baby. With this coordinated care plan, along with the state's leading technology and research in infant mortality, Hoosier moms have access to better outcomes whether their diagnosis is provided early in the pregnancy or they are transferred to IU Health via Lifeline with an immediate need. Learn more at <u>rileychildrens.org</u>.

About Patients Choice Laboratories

Patients Choice Laboratories (PCL^{TM}) is a local, full-service, state-of-the-art laboratory providing advanced testing in toxicology, pharmacogenetics, women's health and clinical chemistry.

Parkdale

Parkdale specializes in the identification, treatment, support, and advocacy for the professional afflicted with substance use disorder. Parkdale is a fully licensed and accredited program.

Orexo

Orexo US, Inc., is a specialty pharmaceutical company with a mission to advance the treatment of opioid dependence and support patient care.

Community Health Network

Community Health Network is Central Indiana's largest provider of behavioral health and substance use recovery services, with an extensive continuum of treatment options. Clients may be seen in individual, family or group therapy, utilizing psychiatric assessment and evaluation in the development of personal treatment plans by physicians, psychologists, advance practice nurses, therapists and counselors.

Biodelivery Sciences

Focusing on pain and addiction medicine, BDSI utilizes drug delivery technologies to develop and commercialize new applications of proven therapies to address unmet medical needs.

Christopher Abert

Christopher Abert is a social worker, the director of the Indiana Recovery Alliance, and a person living in long term recovery. He has worked with people who use drugs in numerous capacities over the last 12 years, most recently in the capacity of a worker at a low barrier harm reduction project. Mr. Abert is confident that a confluence of well-funded solutions can help Hoosiers as they face the current opioid, HIV, and HCV epidemics.

Zach Adams

Dr. Zach Adams is an Assistant Professor in the Indiana University Department of Psychiatry. He completed his Ph.D. in Clinical Psychology at University of Kentucky followed by an internship and two-year postdoctoral fellowship at the Medical University of South Carolina supported by the National Institute of Mental Health (NIMH), where he specialized in youth traumatic stress. Dr. Adams's work focuses on the intersection between mental illness, substance use problems, and traumatic stress in young people. He is currently Principal Investigator on a Career Development Award funded by the National Institute on Drug Abuse, involving development and evaluation of a web-enabled mobile application to enhance treatment for co-occurring substance use and mental health problems in adolescents. He is an active collaborator and Co-Investigator on numerous large-scale research projects involving evaluation of behavioral treatments for teens with dual diagnosis of PTSD and substance use problems, dissemination and implementation of evidence-based mental health treatments, use of telemedicine and mobile technologies for improved clinical services in youth and adults, and laboratory investigations of the underlying causes of mental illness and substance use in trauma-exposed youth. He also serves as psychologist and Director of Training for the Adolescent Dual Diagnosis Program at Riley at IU Health.

Monique A. Anawis

Dr. Monique A. Anawis is the Medical Director for the Office of the Illinois Attorney General Lisa Madigan. She is a practicing board-certified ophthalmologist, fellow of the American Academy of Ophthalmology, fellow of the Institute of Medicine, and a fellow and member of the Board of Governors of the American College of Legal Medicine. She is an Assistant Professor of Clinical Ophthalmology at Northwestern University Feinberg School of Medicine. As an attending physician, Dr. Anawis has held the positions of vice-president of the medical staff, co-chair of the medical executive board, and member of the hospital peer review and credentials committees. Dr. Anawis graduated magna cum laude from Brown University and earned her medical degree with honors from Brown University School of Medicine. She currently serves as a member of the Brown University Alumni Medical Board. As past chair and member of the Blindness Prevention Task Force of the NGO and Vision 2020 partner, Health For Humanity, Dr. Anawis continues to teach and collaborate with physicians in the U.S., Europe and Mongolia.

Barbara Andraka-Christou

Barbara Andraka-Christou is Corporate Counsel for Enfoglobe, Inc. and an Adjunct Professor of Health Policy at Indiana Wesleyan University. She received her Bachelor's degree in Economics (summa cum laude) from the University of Florida. Barbara received her J.D. from the IU Maurer School of Law in 2013 and defended her dissertation in Law and Social Science (from the IU Maurer School of Law) in July 2016. Barbara began a post-doctoral research position at the IUPUI School of Public Health in August 2016, where she will research prescription pain killer overuse prevention and treatment programs. Her Ph.D. dissertation examined the social and legal perspectives of the under-use of addiction treatment in the U.S. Barbara has published multiple articles regarding the opioid overdose crisis and addiction treatment in law, public policy, and neuroscience journals. She also regularly presents her research at legal and health conferences.

Lina Avendano

Lina Avendano is a fellow of the American Academy of Manual Orthopedic Physical Therapists. She has obtained a Masters in Health Sciences, Doctorate of Physical Therapy, and is a Board Certified Orthopedic Clinical Specialist. Lina has been assisting with manual therapy education at both state and national levels. She has collaborated with peer-reviewed publications for PT Now and is the current Vice Cahir of the Indiana Chapter of Manual Physical therapists.

Sarah Barham

Sarah Barham has worked in the field of addictions and mental health for almost ten years, and some of her previous employers include: Tara Treatment Center, Johnson County Juvenile Detention and Community Corrections, and Serenity Counseling. She earned a bachelor's of science degree in Psychology from IUPUI in 2007 with a concentration in the Psychobiology of Addictions and currently holds a CADAC II. She has been a Recovery Coach at Centerstone since February 2015. She also serves as a Recovery Coach with the Mental Health Court in Marion County.

Meagan Benetti

Meagan Benetti MS is a Visiting Research Associate with the Collaborative Research Initiative at Indiana University and is the evaluation project director of a federal grant that focuses on improving early childhood outcomes through implementation, enhancement, and expansion of programs and policies of early childhood systems. She has served as the co-principal investigator of a jail-based substance abuse treatment program evaluation project and has partnered with several other similar projects aimed at evaluating and building substance abuse intervention and prevention initiatives through technical assistance and capacity building.

Jane A. Bisbee

Jane A. Bisbee has been the Deputy Director of Field Operations for the Indiana Department of Child Services since August 2013. Regional Managers, Local Office Management, case managers and support staff are part of the Field Operations Division. Ms. Bisbee has worked for the State Of Indiana for almost thirty-two years in a variety of capacities including caseworker in Marion County, supervisor in Lawrence County, consultant for quality control, county director in both Owen County and Greene County, and Regional Manager in Lake County. She was also the state Deputy Director of Child Protection for the Family and Social Services Administration, Division of Family and Children. Ms. Bisbee has worked as a consultant for the federal government during Child and Family Services Reviews across the country. She has also been an instructor at Purdue University and Indiana University Northwest. Ms. Bisbee graduated from Gavit High School in Hammond; has a Bachelor's degree in Education from Indiana State University and a Master's in Social Work from Indiana University. Ms. Bisbee has two children, five grandsons and currently resides in Crown Point Indiana.

Johnathan Blanton

Johnathan Blanton is the Chief of the Consumer Protection Section at the Ohio Attorney General's Office. Prior to becoming Chief in December of 2014, Jonathan served as the Deputy Director for Investigations and Enforcement and Interim Executive Director of the State Medical Board of Ohio. Jonathan previously served as the director for Attorney General DeWine's Consumer Protection Section's Economic Crimes Unit. Before joining the AG's Office, Jonathan was the Jackson County, Ohio Prosecuting Attorney for more than 10 years.

Victor Antonio Carrancá Bourget

Victor Antonio Carranca Bourget has been the Attorney General of Puebla, since February of 2011. He received his law degree from the Intercontinental University with a specialization in "Amparo" (similar to habeas corpus appeals) from the National Supreme Justice Court's Specialization Institute. He received his Master in Criminal Law, Constitution and Rights from the Autonomous University of Barcelona and the Autonomous Metropolitan University, and he has a diploma in Philosophy from the Autonomous Technological Institute of Mexico (ITAM). In the public sector, he served in the central office of the government of the Federal District, democratically elected, as the Chief Deputy Attorney General for Criminal Prosecutions in the Federal District Attorney General's Office of the Federal District, during the administration of Cuauhtémoc Cardenas. In the academic arena, he has served as a professor of law in Criminal Procedure, Guarantees and "Amparo" at Intercontinental University, and has taught Masters Courses in Criminal Procedure at the National Institute of Advanced Legal Studies in Criminal Law (INDEPAC) and at the National Institute of Criminal Justice Sciences (INACIPE).

Caleb Branam

Caleb Branam was born and raised in Bloomington, IN. He received his Bachelors in Psychology from Saint Joseph's College where he also competed collegiately on the track team. He then received his Master's in Counseling Psychology from Indiana University. Caleb is currently a Licensed Mental Health Counselor. Caleb has worked in the addiction field since 2009 when he began facilitating IOP, BIG and SAEC groups. Caleb provides annual training for Recovery Coaches and supervises the Recovery Engagement Center. He has also assisted in Recovery Works program in the Monroe Co Jail to help offenders with access to treatment.

Rich Bramer

Richard M. Bramer joined the National Association of Attorneys General's ("NAAG") National Attorneys General Training and Research Institute ("NAGTRI") as Program Counsel in March 2016, where he concentrates on training for staff members of the 56 attorneys general offices served by NAGTRI. These programs include focuses on state agency attorneys and litigation attorneys who work for attorneys general. Bramer also supervises the law clerk, visiting fellow, and extern programs and their employees at NAGTRI. Bramer joined the Office of Indiana Attorney General Steve Carter in 2002, first serving in the Civil Rights and Employment section, concentrating on federal litigation and defense of judges and prosecutors. He then was assigned to the Advisory Division as counsel to the Indiana Department of Labor and the Indiana Department of Correction after the election of Governor Mitch Daniels. In 2008, Attorney General Carter promoted Bramer to Chief Counsel of the Advisory Division, and he continued to serve in that capacity under Attorney General Greg Zoeller. Zoeller later appointed Bramer to serve as the office's Federal and Congressional Liaison based in Washington, and then as Director of Indiana's Consumer Protection Division, which also oversees multi-state and antitrust matters for the Indiana Attorney General. In 11 years of small town private practice, Bramer served in part-time positions as Sullivan County chief deputy prosecuting attorney, Sullivan city attorney, judge pro tempore of the Sullivan Circuit Court, school corporation attorney, and counsel to numerous towns, townships, and conservancy districts in Sullivan County and elsewhere in southwestern Indiana. Bramer also previously served as an attorney in the Office of the Assistant Secretary of Civil Rights for the United States Department of Agriculture in Washington, D.C., and as chief of staff and chief counsel to the Indiana State Treasurer. Bramer is an alumnus of Sullivan High School, Wabash College, and Indiana University School of Law - Bloomington.

Congresswoman Susan W. Brooks

Susan Brooks represents the 5th District of Indiana, which spans eight diverse counties throughout the central part of the Hoosier State. After receiving her undergraduate degree from Miami University in Oxford, Ohio, Susan earned a Juris Doctor from the Indiana University Robert H. McKinney School of Law. In May of 2013, Susan was awarded an honorary Doctor of Public Service degree from Marian University in Indianapolis. She resides in Carmel, Indiana with her husband David. They have two young adult children. She currently serves on the House Energy and Commerce Committee and is a member of the Commerce, Manufacturing and Trade, the Health, and the Oversight and Investigations Subcommittees. Susan also serves on the House Ethics Committee and the Select Committee on the Events Surrounding the 2012 Terrorist Attack in Benghazi.

Tracy Brooks

Dr. Tracy Brooks joined the Pharmacy Program in March 2011 and was appointed Interim Department Chair of Pharmacy Practice in June 2012. She oversees programs of education, research and service in the Department of Pharmacy Practice and supports efforts in managing programs for faculty, education, research and service, initially focusing on site development and faculty mentoring She also teaches in pharmacy practice courses. Dr. Brooks has nearly 20 years of clinical experience in inpatient, ambulatory and home health care environments, and most recently was a clinical pharmacist with Parkview Home Health and Hospice in Fort Wayne. She earned her Pharm.D. from Purdue University.

Mike Brown

Mike Brown was born and raised in Fort Wayne, Indiana and became a Basic EMT in 1997, a paramedic in 2000, and the District Chief of EMS for the Fort Wayne Fire Department in 2015. He worked for a local provider for 10 years between full and part time. Mike became a member of the Fort Wayne Fire Department in 2004 and continues to work part time as a flight paramedic with the Samaritan Program. He joined the training division of the fire department early in 2015 where he served during implementation of the Narcan program.

Krista Brucker

Dr. Krista Brucker, MD, is a faculty member with the Indiana University School of Medicine's Department of Emergency Medicine. Her research interests include mental health and substance abuse treatment in emergency department settings.

Judi Coffey

Judi Coffey is currently a sex crimes deputy prosecutor with the Monroe County Prosecutors' Office. Her job prior to that was Supervisor of the Prescription Drug Abuse Team for the Medicaid Fraud Control Unit in the Office of the Indiana Attorney General. She began her legal career as a Deputy Prosecuting Attorney in Marion County, Indianapolis in1995. She prosecuted hundreds of cases at the felony level and tried over 100 first chair jury trials. She was promoted to Senior Deputy Prosecutor in 2003 and appointed to the first Homicide Division team in Marion County. In 2009, she was appointed as the Director of the Marion County Child Advocacy Center responsible for the screening and charging of all child abuse and sex crime cases. After sixteen years in the field of prosecution, Judi began work for the Family and Social Services Agency in the Office of Medicaid Policy and Procedure. She was the Government Relations Manager and then appointed as the Director of Program Integrity overseeing the Audit, Investigation and Prepay Review teams. Judi holds a bachelor's degree from Indiana University in Business Administration and a Juris Doctorate in Law from the Indiana University McKinney School of Law.

Sara Cozad

Sara Cozad is the Assistant Deputy Director of Adult Services with the Indiana Division of Mental Health and Addiction (DMHA). In her role, Mrs. Cozad works to oversee programming areas including: Serious Mental Illness and Co-occurring Disorders, Problem Gambling Services, Older Adult Services, Housing Assistance, Emergency Preparedness, and Forensic Treatment Services. Prior to joining DMHA, Sara spent seven years working for a Community Mental Health Center in Indianapolis. During her time at the CMHC, Sara took the opportunity to gain experiences in several different roles. She provided direct practice care to a variety of populations, with a focus on trauma and working with family systems. Sara also worked as a clinical supervisor for an outpatient team of clinicians, while continuing to work in direct service. In 2011, she shifted her professional focus solely to leadership and administration within the CMHC. Sara held clinical leadership positions in Outpatient, DCS, and School-based Services, prior to becoming the Director of Clinical Training and Development in 2013. As Director of Training, Sara worked to onboard hundreds of new employees and provided ongoing clinical best practice trainings to all staff. In her role at DMHA, Mrs. Cozad continues to focus her energy on sharing information on best practices and advancing mental health and addiction treatment services in Indiana.

Lori Croasdell

Lori Croasdell, a native of Indianapolis, graduated from Ben Davis, received her Bachelor's degree in Communication and Psychology from Olivet Nazarene University and her Master's degree in Organizational Communication and Public Relations from Ball State University. Prior to getting involved in community substance abuse prevention and education, she taught college level communication courses. Family struggles with substance abuse personalized this issue for her. Lori's time is filled with managing her home and family, serving as Coordinator of CEASe of Scott County (LCC-Coalition to Eliminate the Abuse of Substances), Communication Specialist/Outreach Coordinator for Communities That Care (youth prevention), and Rx Drug Abuse Prevention Coordinator for Partnerships For Success II (12-25 year old prevention). She is committed to her faith, her family, and her community. Her county is last in healthy outcomes in the State of Indiana and has high youth tobacco and alcohol use and adult opiate use, along with a recent and unprecedented HIV outbreak due to IDU of Opana. Her latest efforts involved the implementation of a county-wide youth and young adult positive social norms campaign called "What's Your Side Effect?"

Guillermo Cutrone

Guillermo Cutrone holds a Doctor of Science in Physical Therapy Orthopedics. He is certified in Mechanical Diagnosis and Therapy by the McKenzie Institute International, Board Certified in Orthopedic Physical Therapy, and a Fellow in the American Academy of Orthopedic Manual Physical Therapists. Dr. Cutrone has an active role with the Education Committee Americas under the International Federation of Orthopedic Manipulative Physical Therapists. He also serves the role of Research Coordinator and Residency/Fellowship Team Leader for the Rehabilitation Services department at St. Vincent Hospitals in Indianapolis, Indiana, providing clinical instruction into the Evidence in Motion Post Graduate Orthopedic Physical Therapy Residency and the Evidence in Motion Orthopedic Manual Physical Therapy Fellowship. Dr. Cutrone has presented in national and international orthopedic and sports Physical Therapy research meetings.

Patti Darbishire

Patti Darbishire is a Clinical Associate Professor and Experiential Learning Program Director for the Purdue University College of Pharmacy. She administrates community and hospital-based pharmacy experiences for students in the first three years of the professional Doctor of Pharmacy program. Her research interests include community-based clinical programs, self-care, patient education and counseling, medication error prevention, medication adherence, and drug abuse prevention. Additionally, she is the Editor-in-Chief of the Purdue Journal for Service-Learning and International Engagement, a Purdue Community of Service-Learning faculty fellow and a faculty fellow for the Purdue Center for Instructional Excellence. Dr. Darbishire is a working member of the Indiana Attorney General's Drug Abuse Prevention Task Force (Medication take-back committee).

Alexis Dean

Alexis Dean is the Executive Director of Re-Entry and Medicaid for the Indiana Department of Correction. She is a native of Hoopeston, Illinois and a graduate of Indiana State University where she earned her Bachelor's degree in Sociology. She began her career with the Indiana Department of Correction in 2007 at the Plainfield Correctional Facility as a Substance Abuse Counselor. She was on the team of staff selected to start the G.R.I.P. Therapeutic Community at the facility in 2008. In 2009, she accepted a position at the Plainfield Re-Entry Educational Facility as a Re-Entry Specialist assigned to the substance abuse department. In 2010, she crossed over to case management and was selected to open the first ever veteran-specific unit within the Department. The INVET (Indiana Veterans Education and Transition) Unit opened in January 2011. Alexis elected to step away from state employment and accepted a position in 2012 to be the Youth & Family Outreach Coordinator at The Ember-Wood Center. She returned to the Department of Correction in 2013 as the Re-Entry and Addictions Services Monitor before accepting the position of Director of Case Management in 2014. Alexis is a certified Problem Gambling Counselor and Licensed Addictions Counselor.

Mitchel Denham

Mitchel T. Denham heads the Civil Branch in the Office of the Kentucky Attorney General. Denham is the former assistant deputy attorney general where he supervised the criminal divisions of the Kentucky Attorney General's Office. In that role, he managed the Department of Criminal Investigations, the Office of Special Prosecutions, the Office of Criminal Appeals, the Office of Medicaid Fraud and Abuse Control, the Prosecutor's Advisory Council and the Office of Victim's Advocacy. He also advised the Attorney General on public policy matters, draft legislation, and handled complex civil and criminal litigation in both state and federal courts. Denham also served as the Attorney General's designee on the KASPER Advisory Council and the Recovery Kentucky Task Force. Prior to joining the Attorney General's Office, Denham was a deputy division chief and senior narcotics prosecutor at the Commonwealth's Attorney in Jefferson County. Denham is a native of Maysville and a graduate of Centre College, where he received his B.S. in Economics. He graduated from the University Of Kentucky College Of Law in 2003. He also serves as a trustee on the Louisville Children's Hospital Foundation.

Joan Duwve

Dr. Duwve is the Associate Dean for Public Health Practice and a Clinical Associate Professor in Health Policy and Management at the IU Richard M. Fairbanks School of Public Health and also serves as the Chief Medical Consultant at the Indiana State Department of Health. She has a strong interest in injury prevention, management of infectious disease outbreaks, and immunizations. She co-chairs the State Suicide Prevention Advisory Committee and the State Prescription Drug Abuse Prevention Task Force. She has served on numerous committees and boards, including the State Child Fatality Review Team, the State School Safety Advisory Committee, the Indiana Cord Blood Bank Board of Directors, the Medicaid Advisory Committee, the Mental Health and Addiction Prevention Advisory Committee, and Covering Kids and Families of Indiana. Working closely with the Office of the Attorney General, she has focused recently on educating Hoosiers about the epidemic of prescription drug abuse and overdose deaths.

John Ellis

Dr. John Ellis is currently the Medical Director at Managed Health Services (MHS), a health insurance provider that has been proudly serving Indiana residents for two decades. He currently is serving on the Executive Committee of the Indiana State Medical Association. He serves as board member of the following organizations: Indiana Health Information Exchange (IHIE), Improving Kids Environment, Indiana Perinatal Quality Improvement Collaborative (IPQIC) and the treatment committee of the Indiana Prescription Drug Abuse Prevention Task Force. Dr. Ellis was President of the Indianapolis Medical Society from 2009-2010. He got his medical degree from University of Rochester College of Medicine and Dentistry.

Joan Erwin

Joan Erwin is the Sr. VP of Expansion Operation for CleanSlate Centers. She has a BA from Mount Holyoke College and her degree in Nursing from the University of Massachusetts. Joan has been with CleanSlate Centers for 5 years and is responsible for creating access for patients in new markets.

Randy Evans

Randy Evans LAC, worked in professional Christian Ministry for 30 years, and has been a certified and licensed Addiction Counselor for 12 years. In 2003, he worked at Liberty Hall in Indianapolis for two years with 160 male felons who struggled with substance abuse, and then female inmates of Marion County Sheriff's Department for four years. He currently runs an Intensive Outpatients group at Families First Indiana, where he specializes in a Recovery Lifestyle for clients addicted to any and all substances. He created a 12 session Highly Effective Fathers group in 2013 where he teaches for men wanting to be the fathers their children deserve. Randy is also a professional pianist and has played in venues all around central Indiana for the last 21 years.

Jay Frederick

Jay Frederick is a supervisor with Columbus Police Department. He has been a full-time police officer for 26 years. Sgt. Frederick has served as a patrolman, D.A.R.E. Coordinator, detective, and manager of the Criminal Investigations Division and Narcotics Unit. He is a certified Medico-legal Death Investigator and a member of the International Homicide Investigators Association. He has served over two decades as a deputy coroner in Bartholomew County. Sgt. Frederick is active in drug diversion investigations and is a member of the National Association of Drug Diversion Investigators (NADDI), and serves on the board of its Indiana chapter. He is president of the Bartholomew County Substance Abuse Council, and serves as chair of the Enforcement Committee on the Indiana Attorney General's Prescription Drug Abuse Prevention Task Force.

Rodrigo Garcia

Rodrigo Garcia is a certified registered nurse anesthetist by trade. He is also the executive program director for the Parkdale Center located in Chesterton Indiana specializing in diagnosis, treating, and advocating for the highly accountable professional with substance use disorder. He has extensive personal and professional experience with substance abuse within the health care industry, by health care providers. He is an active member of The Indiana Drug Task force~ Bitter Pill, the National Safety Council, The American Association of Nurse Anesthetists, and the Indiana Coalition for the Addiction Management of Professionals. Rodrigo speaks nationally to employers, regulatory agencies, law enforcement, highly accountable professionals on topics of prevention, identification, and management of prescription abuse and diversion from the workplace.

Linda Hathaway

Linda Hathaway has worked with adults to help them gain an understanding of the current crisis of prescription medications being used by society in general and specifically in the teens of today. Necessary accurate education for adults – both professionals and parents regarding abuse and overdose of prescription medications requires a look at the broad community. Her passion is to give attendees some practical ideas that can be implemented immediately. She is responsible for the development of the education programs at McMillen Health. Linda holds a M. Ed in Instructional design from Western Governors University and she is certified in family and consumer sciences through the American association of family and consumer sciences.

Marcia Haaff

Marcia Hauaf has a Bachelor's Degree majoring in Biology from The University of Toledo and an MBA from Indiana University. She began her career with The Lutheran Foundation in 1995 and has served as Chief Executive Officer since the organization's inception! She has been blessed to help the Foundation invest more than \$150 million in grants during that time. Marcia is active in the community by nature in her role at The Lutheran Foundation. She has served on various Boards and Committees over the years. She currently serves on the Parkview Behavioral Health Operating Council, the Multicultural Health Initiative Advisory Board, the Lutheran Scholarship Granting Organization of Indiana, and as the President of Community Partnerships Inc. (CPI). Marcia has led the Foundation in developing a resource tool for Northeast Indiana that will provide education, connection, and promotion for mental health and wellness. Learn more at LookUpIndiana.org.

J. David Hawkins

J. David Hawkins ,Ph.D., is the Endowed Professor of Prevention and Founding Director of the Social Development Research Group, University of Washington School of Social Work. His work focuses on understanding and preventing child and adolescent health and behavior problems. He seeks to identify risk and protective factors for behavioral health problems and to understand how these factors interact in the development of healthy behavior and the prevention of problem behaviors. He co-developed the experimentally proven Guiding Good Choices parenting program, the Raising Healthy Children program, and the Communities That Care prevention system. Dr. Hawkins is a current member of Board on Children, Youth, and Families and the Forum on Promoting Children's Cognitive, Affective, and Behavioral Health at the National Academies of Science, Engineering and Medicine. He is a current member of the Blueprints for Healthy Youth Development Advisory Board and a past president of the Society for Prevention Research. He received his Ph.D. in sociology from Northwestern University. He is a Fellow of the Society for Prevention Research, the Academy of Social Work and Social Welfare, the American Society of Criminology, and the Academy of Experimental Criminology. He is committed to translating research into effective practice and policy to improve adolescent health and development.

Maria Del Rio Hoover

Dr Maria Del Rio Hoover joined St Mary's Hospital for Women and Children after finishing a neonatology fellowship at the University of Miami, Jackson Memorial Hospital. She became the Medical Director of St Mary's Center for Children in 2014 after spending over 25 years in the practice of neonatology. She co-chairs, with Dr John Ellis, the Perinatal Substance Use Committee of the Indiana Perinatal Quality Improvement Collaborative. She is a member of the Vanderburgh County Board of Health and the Commission on Legislation of the Indiana State Medical Association. Throughout her career she has served on multiple state and local boards, committees and commissions all focused on improving the health and wellbeing of women and children in Indiana.

Wesley Horner

Wesley Horner is a fourth professional year student in the Purdue College of Pharmacy. He is currently on clinical rotation at Walgreens Pharmacy performing Medication Therapy Management services. His professional interests include: pharmaceutical business, management, and pain management and his future career plans include pursuing post-graduate training in the form of a fellowship to gain a better understanding of the pharmaceutical industry.

Allison Howland

Allison Howland, PhD is the principle investigator of two multi-year federal grants to expand and enhance maternal, infant, and early childhood home visiting and to pilot strategies to address unmet health needs for children ages 0-8 and their caregivers. Additionally, she is the director of the Collaborative Research Initiative (CRI) at Indiana University. CRI has been active in providing technical assistance and evaluation support for multiple Local Coordinating Councils for substance abuse prevention across the state and is currently leading an Interact for Health Opioid Prevention Planning Grant for six-county region.

Leslie Hulvershorn

Dr. Leslie Hulvershorn is a specialist in the treatment of adolescent SUDs and serves as Assistant Professor Psychiatry in the Department of Psychiatry at the Indiana University School of Medicine (IUSM). Dr. Hulvershorn completed her B.S. in Neuroscience at Indiana University Bloomington, a Master's of Science in Neuroscience at the University of Oxford and medical school at the IUSM. She completed her general psychiatry residency at IU and then her child and adolescent fellowship at the New York University School of Medicine. Nationally, Dr. Hulvershorn is a leading researcher in neuroimaging youth with elevated risk for the development of SUDs. She completed a 5 year research training grant funded by the National Institute of Drug Abuse and will be starting a large-scale research study in 2016 entitled "Neural Response to Risky Decision Making in Youth at High Risk for Substance Use Disorders and HIV." Dr. Hulvershorn has authored over 30 publications in child and adolescent psychiatry, including several in the area of adolescent SUD treatment.

Larry Humbert

Larry Humbert has nearly 30 years of experience in the field of maternal and child health. He seared as a section chief in the maternal and child health division at the Indiana state department of health and program director at Prevent child Abuse Indiana. He also worked as a Medical Social Worker at Indiana University Hospital and Riley Children's Hospital. From 2003-2007 he served as the Director of Indiana Access at the Indiana Prenatal Network and the executive Director from 2007-2014. Larry received his bachelor's degree in social work from northern Kentucky University and a masters in social work from the University of Louisville. Larry resided in England for three years where he received a post graduate diploma in public service and not for profit management at the South Bank University of Business in London.

Kristina Johnson

Kristina Johnson has a Bachelor's degree in communication and management from Concordia University, and an MBA from Indiana Wesleyan University. She is the Director of Community Initiatives at The Lutheran Foundation, focusing on their mental/behavioral health and wellness initiative for the ten northeast Indiana counties they serve. During her tenure at The Lutheran Foundation, Kristina has initiated a regional mental health coalition, bringing together various community segments throughout the region to collaboratively focus on improving mental/behavioral healthcare. Additionally, she is responsible for *Look Up* (www.lookupindiana.org), a website providing mental health content and resources, mental health provider listings, crisis connectivity, and campaigns designed to reduce the stigma associated with mental illness and addiction. She is also a member of the Children's Health Improvement Plan (CHIP) for Allen County focusing primarily on the mental health sub-committee, and serves on the Allen County Opiate Task Force. She serves on the Allen County Juvenile Center (ACJC) advisory committee, and the Juvenile Detention Alternative Initiative (JDAI) advisory committee in Allen County. More recently, Kristina was asked to serve on the governance board of Indiana's Division of Mental Health and Addiction, System of Care.

Cindi Koh-Knox

Cindi Koh-Knox is a Clinical Associate Professor in Pharmacy Practice and a Faculty Liaison for Continuing Education and Professional Development at Purdue's College of Pharmacy. She earned her Doctor of Pharmacy from Purdue and completed an ASHP-accredited Pharmacy Practice Residency at Clarian Health Partners – Methodist Hospital. Her current research areas include pharmacy involvement in the courts and inter-professional, experiential learning. She currently coordinates/teaches Complementary and Alternative Medicine, Dietary Supplements, beyond ecstasy: Street drugs, Intercultural and Global Health Issues, and Public Health. She serves as a preceptor for pharmacy experiential rotations in academia, community corrections, community health clinic, family health clinic, and wound care, and is a faculty advisor to multiple pharmacy student organizations

John P. Koremenos

John P. Koremenos Jr. has served as Special Assistant to Attorney General Brad Schimel since January 2015, after successfully managing Schimel's 2014 campaign and subsequently, serving as Schimel's transition director. In his capacity at the Wisconsin Department of Justice, Koremenos acts as project manager on many of the Attorney General's policy initiatives, including open government, violence against women, and opiate addiction, and is a key member of the office's communications team. Koremenos' experience also includes work on behalf of the Republican Party of Wisconsin, former governor Tommy G. Thompson, and State Senator Leah Vukmir. A graduate of the University of Wisconsin-Madison, Koremenos earned his B.A. in Political Science and Sociology.

Mark Krueger

Mark Krueger, PharmD, graduated from Butler University with a PharmD degree and began working with Walgreens in May of 2006. During school he was an intern with Osco Pharmacy. In his time with Walgreens he worked as a staff pharmacist in Kokomo and on the west side of Indianapolis at 38th & High School Road. He has worked as pharmacy manager at a store in Anderson and have spent the last 7 1/2 years as the pharmacy manager at 38th and Post in Indianapolis.

Jessica Krug

Jessica Krug joined the Office of the Indiana Attorney General in January 2012 and is currently a Supervisory Deputy Attorney General. She has served in both the Licensing Enforcement and Homeowner Protection Unit and the Medicaid Fraud Control Unit. Jessica is assigned to criminal, civil, and administrative matters including cases regarding allegations of violations in the different healthcare professions. Prior to the OAG, Jessica worked as a Staff Attorney at the Indiana Department of Child Services. She is a graduate of Indiana University-Bloomington and Northeastern University School of Law. The Indianapolis native resides in her hometown with her husband and two children, Jack and Nora.

Amy LaHood

Dr. Amy LaHood graduated from Rush Medical College in Chicago and completed her family medicine residency at Mac-Neal hospital followed by a fellowship in Maternal Child Health. Following her training, Dr. LaHood spent 5 years working in Indianapolis at a community health center and then joined St. Vincent Family Medicine Faculty in 2005. Dr. LaHood has a passion for population and public health and completed her Master's in Public Health from IUPUI in 2010. Dr. LaHood has served as a volunteer member of the Attorney General's Task for Prevention of Prescription Drug Abuse since 2012. In addition to teaching residents, Dr. LaHood continues working to educate and empower physicians and community stakeholders to reduce the burden of opioid misuse and addiction.

Darrin Mangiacarne

Darrin Mangiacarne DO, MPH is the Medical Director at Fairbanks Hospital. He earned his medical degree from the Philadelphia College of Osteopathic Medicine in 2006. After completing his family medicine residency, he completed an addiction medicine fellowship at Geisinger. Dr. Mangiacarne is board certified in Family Medicine and Addiction Medicine. Dr Mangiacarne has extensive experience working with impaired professionals and patients with co-occurring disorders. He earned a Masters of Public Health from the University of Southern Mississippi in 2014.

Vera Mangrum

Vera Mangrum works for the Division of Mental Health and Addiction (DMHA) within the Indiana Family and Social Services Administration (FSSA). In her role as Project Officer and Partnerships for Success Grant Director, she helps communities implement the Strategic Prevention Framework by identifying evidence-based strategies, programs and policies that would have the greatest impact on reducing the abuse and misuse of Rx drugs and alcohol. Vera Mangrum brings near 20 years of prevention experience.

Kim Manlove

Kim Manlove AB MS, Director of the Indiana Addictions Issues Coalition is an educator and parent who transformed the death of his son David from substance abuse and addiction into an opportunity to educate adolescents, parents, educators and community members about drug and alcohol prevention, intervention, addiction treatment and recovery. Kim is also a person in long term recovery from the disease of addiction. He is active in a number of local and nation substance abuse prevention organizations and support groups including the Indiana Attorney Generals Rx Drug Abuse Task Force, Drug Free Marion County, The Partnership for Drug-Free Kids, Many Faces 1 Voice, the Anonymous People Project, the National Inhalant Prevention Coalition and participated on the steering committee of the Drug Enforcement Administration's National Vigil for Lost Promise, honoring the victims of substance abuse. He is currently Co-Chair of the Parent Advisory Board of the Partnership at DRUGFREE.org and serves as one of their Parent Ambassadors and Coaches. In 2006 he was one of the founding board members of The 24 Group, an independent nonprofit organization that believes those touched by addiction in adolescence and young adulthood deserve support and advocacy.

Greg May

Greg May has worked in community mental health for 14 years. Greg has extensive experience working with adults with mental health and substance use disorders. Greg advocates for organizational change that is inclusive and supportive of a culture of recovery. Currently, Greg serves as the Administrative Director of Adult and Family Services for Centerstone of Indiana. Dr. May received his Doctor of Education in Organizational Management from Oakland City University. In addition to his work at Centerstone he serves as a job search consultant at the Monroe County Public Library, an instructor trainer for the American Red Cross, and a cook for Mother's Cupboard in Bean Blossom.

Deborah McMahan

Deborah McMahan MD, was appointed Health Commissioner of Allen County in May 2000. She is charged with carrying out the department's mission of promoting healthy lifestyles and preventing injury and disease for all of Allen County residents. She earned her B.S. from Purdue and medical degree from the Indiana University School of Medicine. Dr. McMahan serves on numerous community boards and was recently awarded the Milton and Ruth Roemer Prize for Creative Public Health Work from the American Public Health Association. Deb McMahan grew up in Fort Wayne attended IPFW. She graduated with a B.S. in Biology and then received her medical degree from Indiana University School of Medicine. She completed residency training in Internal Medicine followed by a three year fellowship in health outcomes research at Regenstrief Institute. She is board certified in Internal Medicine. She has been the Health Commissioner since May 2000. Her passion is her faith and working to ensure that all kids have a healthy, safe start in life.

Tara O'Connor Shelley

Dr. Tara O'Connor Shelley is an Associate Professor and Director of the Criminal Justice Leadership and Public Policy Institute in the School of Criminology and Criminal Justice and Strategic Studies at Tarleton State University. Dr. Shelley received her PhD in Criminology and Criminal Justice at Florida State University and her MS in Justice, Law and Society from the American University. She previously worked as an Associate Professor and Co-Director of the Center for the Study of Crime and Justice (CSCJ) in the Department of Sociology at Colorado State University. Prior to joining academia, Dr. Shelley worked for the Florida Department of Law Enforcement (FDLE), the Police Executive Research Forum (PERF), and the Justice Research and Statistics Association (JRSA). She has recently published in Deviant Behavior, Social Psychology Quarterly, Critical Criminology and Violence and Victims.

Dan O'Donnell

Dr. Dan O'Donnell completed his B.S. in Psychology at the University of Michigan. He received his medical degree from Wayne State University School of medicine. Afterwards Dr. O'Donnell completed both his residency training in emergency medicine and fellowship training in prehospital care at Indiana University School of Medicine. Dr. O'Donnell currently serves as the Medical Director for Indianapolis Emergency Medical Services and the Indianapolis Fire Department. He also serves as the Medical Director for the Indianapolis Metropolitan Police SWAT team and is an Emergency Physician at Eskenazi hospital. For the past 8 years, Dr. O'Donnell has had the pleasure to serve the city of Indianapolis Dept. of Public Safety on a variety of projects from police naloxone delivery to public AED placement. His clinical and research interests focus primarily how EMS and public safety integrate with public health

Courtney Olcott

Dr. Courtney Olcott works at the Indiana Prevention Resource Center (IPRC) at Indiana University and has near two decades experience working in substance abuse prevention and mental health. Dr. Olcott has served as project manager and evaluator for community grant projects on the prevention of substance abuse in Indiana, including as the leader on grants specific to the prevention of prescription drug abuse/misuse in local Indiana communities.

Justin Phillips

Justin Phillips is the President and Founder of Overdose-Lifeline, Inc. Overdose-Lifeline, Inc, is an Indiana based nonprofit organization dedicated to reducing the stigma of addiction and the prevention of overdose from heroin and other opioids. Justin formed the nonprofit in 2014 after the death of her 20 year old son, Aaron to a heroin. Justin, and the Board of Overdose-Lifeline, Inc., have worked to raise awareness of the heroin epidemic and provide resources for prevention. In 2015 Justin worked with Senator Merritt on the passage of SEA 406/Aaron's Law to allowing for layperson access to Naloxone. Overdose-Lifeline has numerous resources on its website including a ground breaking prevention education program

Alexa Proctor

Alexa Proctor is a fourth year professional student in the Purdue University College of Pharmacy. She is currently on a clinical infectious disease rotation at Eskenazi Health. Her professional interests include mental health, substance abuse, clinical drug development, and medical information/affairs. Her future career plan is to pursue a post-graduate fellowship and explore the many opportunities for pharmacists within the pharmaceutical industry.

Sam Quinones

Sam Quinones is an American journalist. He is best known for his reporting in Mexico and on Mexicans in the United States. He was a reporter for the Los Angeles Times from 2004 to 2014. Quinones grew up in Claremont, California. He graduated from Claremont High School in 1977 and then attended the University of California at Berkeley, graduating with B.A. degrees in Economics and American History.

Jasynda Radonovich

Jasynda Radonovich is project manager of the education and training team at the Indiana Prevention Resource Center at Indiana University School of Public Health-Bloomington. She facilitates, coordinates and presents webinars, courses, presentations, workshops and trainings in the following areas: substance abuse prevention, evidence-based curriculum, nationally recognized curricula, prevention science, ethics in prevention, the Communities That Care prevention model, drugs of abuse, coalition development, and community needs assessment. Jasynda is also an instructor of Youth and Adult Mental Health First Aid and Question, Persuade, Refer Training. She has experience as a project officer, providing guidance and leadership to communities using prevention and public health models. Jasynda is a Certified Prevention Specialist through the International Credentialing and Reciprocity Consortium.

John Ross

John Ross is the clinical programs manager for the pharmacy unit in the Office of Medicaid Policy and Planning (OMPP) organization. His role is to oversee the clinical aspects of Indiana Medicaid's pharmacy benefit, such as the preferred drug list (PDL) and prior authorization (PA) criteria. John is a registered pharmacist and a registered nurse. He has 17 years of experience in the pharmaceutical industry and 20 years of experience working in pharmacies. Prior to working in a pharmacy, John worked in critical care nursing. John's goal is to Enhance Indiana Medicaid member's access to substance abuse disorder treatments by reducing the administrative burden on Indiana Medicaid providers specializing in the treatment of addiction disorders

Stephanie L. Spoolstra

Stephanie L. Spoolstra LCSW is the Director of Addiction Recovery Services for the Indiana Department of Correction. Stephanie holds a bachelor's degree in both Criminal Justice and Ballet from Indiana University. She received her Master of Social Work in 2007, from Washington University in St. Louis. She began serving the State of Indiana in 2014 as an employee of the Family and Social Services Administration, Division of Mental Health and Addiction, where she was the Deputy Director Adult Mental Health and Addiction Services. She was the lead representative from DMHA during the Scott County HIV Outbreak and oversaw the implementation of HEA 1006 (now called "Recovery Works"). In her current role with the Indiana Department of Correction, Stephanie is responsible for clinical addiction treatment, addiction recovery programming, and the integration of addiction treatment with mental health and physical health services.

John Stutsman

John Stutsman MD, FACOG is the Director of the Kenneth J. Ryan Residency Training Program in Family Planning and the Interim Division Director of Family Planning. He is an Assistant Professor of Clinical *OB/GYN* at the Indiana University School of Medicine. In addition to these roles, John is the Medical Director for Planned Parenthood of Indiana and Kentucky.

Mishka Terplan

Mishka Terplan is board certified in both obstetrics and gynecology and in addiction medicine. His clinical, research and advocacy interests lie along the intersection of reproductive and behavioral health. He attended medical school at the University of California, San Francisco, Residency at the University of Southern California, and completed a research fellowship at the University of North Carolina, Chapel Hill. He has been on faculties of the University of Chicago and University of Maryland. Currently he is the medical director of Behavioral Health System Baltimore (BHSB), the non-profit agency that oversees Baltimore's behavioral health care system, interim medical director of Maryland State Opioid Treatment Authority, and adjunct faculty in Epidemiology and Public Health at the University of Maryland School of Medicine. He has published over 60 articles and represents both ACOG (American Congress of Obstetricians and Gynecologists) and ASAM (American Society of Addiction Medicine) on various federal taskforces and committees.

Marci Toler

Marci Toler earned her Bachelor of Arts in Speech Communication from Indiana. Currently, she is the Director of Coalition Development and Support for Covering Kids and Families of Indiana, Inc. (CKF-IN). She provides technical assistance to both coalitions and partners, statewide to develop, implement and evaluate outreach, enrollment and retention work plans within the guidelines approved by the Executive Committee and the Board of Directors. She is also responsible for encouraging and supporting the implementation of the coalition model to existing CKF-IN coalitions as well as target communities for CKF-IN coalitions and building critical partnerships at the state level in order to address IHCP program implementation issues and successes. Marci has over twenty years' experience working with hospitals and communities across the State of Indiana as a program eligibility expert and providing technical assistance for building successful coalitions with vested partners. Marci has worked closely with healthcare providers, community service agencies and coalition leads in more than 40 counties across the state to connect Hoosiers to health coverage options.

Christy Thrasher

Christy Thrasher is the director of the Indiana Naloxone Project. She is certified Opioid Overdose educator and Harm Reduction trainer through the Harm Reduction Coalition. Ms. Thrasher believes the grass roots community action rooted in Harm Reduction and Public Health will mitigate the damages caused in our communities caused by the current opioid epidemic.

Jaya Tripathi

Jaya Tripathi is the Principal Investigator on the MITRE research initiative on Prescription Drug Misuse, applying health IT expertise and advanced analytics techniques on longitudinal prescription data. She holds postgraduate degrees in Physics and Computer Science. Prior to joining MITRE, she worked at several multinational corporations, applying big data analytics on projects such as a customer retention forecasting pilot and a perishable asset optimization problem. Since joining MITRE, she has done research in physician credentialing, patient consents in EHR, surveillance of anti-viral drugs, telemedicine, and most recently, identifying prescription drug fraud and abuse.

Keith Vukasinovich

Keith Vukasinovick is the CEO of Recovery of Indiana (Richmond, IN), the CEO of Daymont Focus Care (Warren, Ohio) & a Managing Partner of Cornerstone Project (Dayton & Springfield, OH). He also serves as the Clinical Director of Eden Counseling Centers (Columbus, Ohio). Mr. Vukasinovich holds graduate degrees in Counselor Education and Criminal Justice. He is also an alumni of the Kellogg School of Management's Executive Scholar's Program. Mr. Vukasinovich has worked in the field of behavioral healthcare for 20 years and has experience has a clinician, an auditor and an executive. The all of the clinical services program he has created work collaboratively with law enforcement and court services. Opioid dependent clients are typically involved in both treatment programs and the criminal justice system. Effective service delivery can only be achieved when the interface between these 2 systems adheres to MAT evidence-based practices and provides the criminal justice system with reason service options to address the current epidemic.

Michael Wagner

Michael Wagner, is a board certified Forensic Toxicologist (F-ABFT) with 30 years' experience. He is the Medical Director for LabPro Inc. and assists patient care through laboratory science. He is the past Chief Toxicologist for the Cook County Medical Examiner's Office, associate professor in the department of Pharmacology+Toxicology/Department of Pathology at the IU School of Medicine, and Laboratory Director for the Indiana state Department of Toxicology. He has worked in three of the four major disciplines of toxicology (Government, Academic, and Private Sector). Professionally he is involved with providing medical legal testimony and conducting interdepartmental research with various government agencies and academic departments. Currently, he is in collaboration with projects at the National Institute of Drugs Abuse (NIDA), the Mayo Clinic, and the Medical College of Wisconsin.

Donna S. Wall

Donna S. Wall graduated with a BS in pharmacy from Butler University and PharmD from Purdue University. Wall has been practicing in hospital pharmacy for over 35 years and has worked as a Staff Pharmacist and Clinical Pharmacist. Currently she is employed by Indiana University Hospital for the past 22 years. Donna obtained her Board Certification in Pharmacotherapy in 1995. She is an adjunct associate professor of clinical pharmacy at Purdue University and Butler University. Donna is a current member of the Indiana Board of Pharmacy and has served in that role for 20 years holding various leadership positions during that time. She has served on the boards of the National Association of Board of Pharmacy (NABP) and Accreditation Council for Pharmacy Education (ACPE) during which times both organizations developed new groundbreaking national programs. She is currently serving as a member of the FDA Advisory Task force on Pharmacy Compounding and Pharmacy Technician Accreditation Commission. Wall has received the Glen J. Sperandio Award for Advancement of Pharmacy in 2000, the Wyeth Pharmaceutical's Bowl of Hygeia Award in 2001, the FDA Commissioner's Special Citation for NABP's efforts in public safety and has been honored by Butler alumni by being chosen in the first "50 Under 50" recognition.

Harry Webb

Harry Webb is the owner of Webb's Family Pharmacy Rochester and Akron Indiana. Webb is the past President of Community Pharmacies of Indiana and currently serves on their board of directors. He's also a member of Indiana Pharmacist Alliance and Indiana Retail Council. On a community level, Webb is the current Vice President on Fulton County Health Department and member of the Citizen Action Committee working to reduce clandestine meth labs in Fulton County. In 2009, he received the Indiana Academy of Community Pharmacists "Joseph E. McSoley Pharmacist of the Year." Webb graduated with a Bachelor of Science in Pharmaceutical Sciences (BSPS) from Purdue University in 1982.

Greg Westfall

Greg Westfall is the Assistant Special Agent in Charge for the Indianapolis District Office, and is responsible for all of the enforcement and administrative operations for the DEA in the state of Indiana. He began his career with the DEA in October 1996 and has worked in undercover capacities. As a past member of the DEA Clandestine Laboratory Enforcement Team he investigated several large-scale heroin and methamphetamine drug trafficking organizations which led to their dismantlement. He became Group Supervisor of the Reno Resident Office, and he was selected to serve as the Resident Agent in Charge. In 2011, he worked for the DEA's Inspection Division. ASAC Westfall began his assignment here in Indiana June 1, 2015.

Marc Williamson

Marc Williamson graduated with BS in Business from Indiana University in 1982. Has worked in substance abuse prevention since 2003. Coordinated the Fulton County Communities That Care prevention effort from 2010 to 2016. Currently coordinating prevention efforts in Cass County and has served as the coordinator of Drug Free Fulton County, the local coordinating council, since 2015. Current member of the Fulton County Citizen Action Committee that is working to reduce clandestine meth labs in Fulton County.

Sheila Wright

Sheila Wright is a Psychiatric Mental Health Nurse Practitioner at Centerstone in Bloomington Indiana. Sheila's practice consists of approximately one half adults and the other half child/adolescent clients. I have taught at IUPUI and Ivy Tech State College some of the classes taught were psychiatric nursing, nursing communications and pharmacology. I was director of Seasons Geriatric Behavioral Health Unit for five years.

Nicole Zautra

Nicole Zantra İs a Visiting Research Associate at the Collaborative Research Initiative and a doctoral candidate in the Department of Applied Health Science at Indiana University, Bloomington. As a member of the Collaborative Research Initiative and a pragmatic applied public health researcher, Nicole is engaged in the on-going, theory driven evaluation studies of two federally supported early childhood initiatives which include Indiana Project LAUNCH and the Indiana MIECHV Program. Nicole also serves as the evaluation coordinator for a partnership of local community coalitions working to collaboratively develop, implement, and evaluate region-wide strategies to reduce youth substance abuse.

Greg Zoeller

Greg Zoeller was elected Indiana's 42nd Attorney General November 2008 and sworn into office January 12, 2009. Zoeller was reelected to a second term in November 2012 and sworn into office January 14, 2013. In September 2012, Zoeller established the Indiana Attorney General's Prescription Drug Abuse Task Force. In creating the Task Force it was Zoeller's mission to significantly reduce the abuse of controlled prescription drugs and to decrease the number of deaths associated with these drugs in Indiana. As a member of the Consumer Protection Committee for the National Association of Attorneys General, Zoeller serves in a national leadership position. He also serves on the US Department of Justice Executive Working Group to develop greater collaboration and coordination of state and federal criminal justice agencies. Zoeller serves as a member of Indiana's Criminal Justice Institute helping law enforcement agencies with a focus on victim's rights. Zoeller had previously served as Assistant to Vice President Dan Quayle in the White House from 1989-1991 and earlier served then-Senator Quayle in both Washington and Indiana in legislative and executive capacities since 1982. His other government experience includes serving as Special Assistant to the U.S. Attorney General, Richard Thornburg, in 1988 and as Senior Counsel to the House of Representatives Committee on Government Reform and Oversight in 1998.

RESTORING HOPE AND REBUILDING LIVES.

LabPro, Inc. is your trusted partner in providing full spectrum clinical laboratory testing services to support patient care. State of the art facility and equipment provide fast, accurate lab results, and our professional staff ensures the highest standard of customer service. Our mission is to develop a customized solution that allows each provider to dedicate their focus to their patients and provide the highest level of care.

Visit www.LabPro.com for more information.

The Company

Patients Choice Laboratories (PCL™) is a local, full-service, state-of-the-art laboratory providing advanced testing in toxicology, pharmacogenetics, women's health and chemistry. PCL™ founders have extensive experience in laboratory and healthcare industries. The Laboratory Director is a licensed pathologist, who is board-certified both with American Board of BioAnalysis and American Society of Clinical Pathology. The scientists responsible for performing the test methodology meet and exceed the levels of education and experience required by COLA and CLIA to perform high-complexity testing. Testing methods utilized are supported, verified and provide high confidence in consistency and accuracy. Our lab services include pain management, drugs of abuse and pharmacogenetics. PCL™ partners with addiction centers, pain clinics, city/state governments/health systems and independent primary care providers. PCL™ offers rapid testing and reporting which delivers results within 24-48 hours of sample receipt that can be viewed real-time in our provider portal. PCL's reports are provided in a format that is easy to read and color-coded for quick interpretation.

Toxicology

Our Toxicology Department at PCL™ provides screening and confirmation for drugs and their metabolites that are classified as Drugs of Abuse as well as other families of pharmaceuticals.

Pharmacogenetics

PCL™ is proud to offer Pharmacogenetic (PGX) testing panels to help providers better serve their patients. PGX testing provided by PCL™ delivers personalized medicine to patients that is custom-tailored to their specific needs and conditions such as pain management, mental health, and cardiovascular risk.

EXCEPTIONAL CARE. SIMPLY DELIVERED.

If these four words don't convince you, these four patients might.

Robert D.

When my daughter had cancer, their connection to MD Anderson Cancer Network® said it all. They brought the expertise right to us. If you or a loved one ever has cancer, you're gonna be so grateful there's a place nearby like Community Health Network.

My days are a whirlwind. With Community's MyChart, I keep track of everything. For me, my husband, my two boys and soon, my parents.

Ray W.

Because of my chronic illness I have an entire team on my side. Doctors. Dietitians. Pharmacists. You name it and I've got one.

Debbie B.

I have many health issues but Community has a knack for making things easy for me. Whether it's getting my tests scheduled, keeping an eye on my numbers, encouraging me to do my health goals or checking for drug interactions, they're always there. They just provide peace of mind. I truly feel that each doctor, technician and nurse are on the same page.
